**How to make your car and truck ride and drive easier**

Your car and truck will roll over the bumps more smoothly; chassis bearings will last far longer if you lubricate with RPM Chassis Grease T-B. Do the job at least every 1000 miles and you'll always have a tough lubricating film on bearing surfaces that will not rupture under road shocks.

RPM Chassis Grease T-B contains special additives that help it stick on surfaces under the hardest shocks, resist moisture and reduce wear. Ask us about RPM Chassis Grease T-B in the special EZ Fill pail that makes it easier to load grease guns.
