## WHAT'S DOING

Cal Horn, your Telephone Manager

Now your voice can answer the telephone when you're away

Scene: an office. Nobody's there. But when the telephone rings, a voice answers: "This is GARDEN 6-8049. We'll be back at 3:30. Would you like to leave a message?" This is our new automatic answering and recording equipment at work. When you're away, it automatically "answers" your telephone, gives callers your recorded message. When you return, it plays back their replies. You can get this handy equipment through your telephone business office.

It's one more way we've found to make your telephone more useful... while still keeping it low in cost. Pacific Telephone works to make your telephone a bigger value every day.

Help yourself to even faster long distance service

One of the big advantages of long distance service is that it saves time—helps you do things in a hurry. This service works even faster for you if you give the operator the telephone number of the person you're calling, not just his name and address. In fact, your calls go through twice as fast. So for the very best long distance service, please call by number.

**ROSES ARE RED  
 VIOLETS ARE BLUE  
 SO ARE THE NEW BELL TELEPHONES TOO!**

Take it from me, there new colors are really beautiful. This is the era of color and surely it makes for pleasant living. We will be providing 8 soft colors of Green, Yellow, Beige, Gray, Blue, Brown, Ivory, and Red. Some of these are now available to give color harmony for any room. If you prefer "two tone" colors we have them with the base of gray, green, red, or ivory with contrasting jet black handset. My suggestion is why not have a "step-saving" extension telephone finished in one of these lovely colors. We have a red one displayed in our business office. Come in and see it, or call us for additional information. Pacific Telephone.

## Standard's heating oil "life line" keeps winter warmth flowing to Pacific Northwest homes

To supply ample heating oil at all times for the people we serve, Standard has stretched a broad network of storage and transportation facilities across the Pacific Northwest. We built a pipe line from Salt Lake City through Idaho, Oregon, into Eastern Washington... constructed giant tanks on our "farm" near Puget Sound... maintain stocks at our bulk plants. Together with efficient trucks, rail, tanker service they make an ever-dependable reservoir of cold-weather protection... to make sure your family will always be comfortable.

... and we're constantly finding ways to improve your car's performance. We built the world's first gas station in 1907 at Seattle. Today, in Standard's "Detergent-Action" gasolines you get the world's first fuels that clean out carburetor deposits (a major cause of engine trouble)... end rough idling, stalling. They boost gas mileage and they're winter-blended for quick starts, fast warm-up too. They're yours exclusively at Standard Stations or independent Chevron Stations.

### Working with you in Washington, Oregon and Idaho

- 2,923 Standard employees
- \$14,096,835 annual payroll
- 4,810 Pacific Northwest shareholders
- \$81,620,424 investment in plant, refinery and distribution facilities
- \$5,000,000 worth of goods and services bought from more than 1,100 Pacific Northwest businesses in 1953
- 2,604 independent businessmen who support themselves and their 7,081 employees by selling Standard products
