

Moro Personals

Mrs. L. V. Moore moved into her Moro home last Thursday. May Ann Brown of Portland is here with her. Mrs. Moore has been living in The Dalles with her daughter Mrs. W. N. Morse for some time.

FOR SALE: 1954 completely automatic washer with new automatic clothes dryer \$354.95. Western Auto Supply Co. 211 E. 2nd St. The Dalles, Oregon. 18-19p

County court members went to Portland Thursday to see the state highway commission about some changes in road markers in which they are interested and to obtain final approval of bridge plans. We were in error last week when we said that the Sherman County Ladies club would hold their meet-

ing the 15th of March. Sunday comes on the 13th and that is when it will be.

Mr. and Mrs. W. T. Balsiger met their son, Edwin, in Portland last weekend and all attended the

Beta sing in that city Saturday night.

Mr. and Mrs. Lester Barnum and sons were in Portland over the weekend for medical atten-

tion. Mrs. Clara Kock accompanied them and attended a birthday party in Oregon City for Mr. Kock's mother who was 91. She also visited her mother, Mrs. M. von Borstel at Gladstone.

BORN Wednesday, March 2 at The Dalles, a daughter to Mr. and Mrs. Tex Irzyk.

Mrs. Dick Hibberd of Elgin, associate grand conductress of the OES was entertained at dinner at the Moro Hotel Wednesday night and afterward gave a school of instruction to about 24 members of the order here.

Total precipitation for the storm up to Thursday morning was .86 at the experiment station. Most of it was in snow which fell often but not for long.

Repair to the city well was completed last week by installation of the spare motor.

High school was dismissed Thursday noon and a bus took children to Madras for an afternoon game with Sisters to the 6B district playoffs.

A number of school patrons went to Madras to see the game and support the team.

Russ Longnecker is here again from Mt. Vernon, Washington and ready to start spraying by air as soon as the wind goes down.

Larry Sayrs writes that he is getting adjusted to the life of a navy trainee at San Diego and likes it fine. Alex Marshall of The Dalles stopped in Moro Thursday while on his way to Madras.

ERECT YOUR OWN "TRUSSLESS" Wonder Building

DO IT YOURSELF!

Don't spend a lot of money having a complicated building erected when you can erect your own Wonder Building with a wrench and screwdriver. The only fastening is a single size nut and bolt. Many sizes up to 60' wide. The most amazing development in the building industry.

How our 125 "dry holes" last year helped keep you on wheels

If you're anything like the average motorist, you'll use about 690 gallons of gasoline this year. And that's just a beginning. Keeping you on wheels and supplying you with the thousand and one "oil-born" products so vital to modern living requires 2 gallons of petroleum a day for every man, woman and child in the U.S.—an increase of 58% since 1941. Helping to keep this oil flowing to you is Standard Oil Company of California's biggest, most expensive, least predictable job. In fact, we plan to invest \$200 million during 1955 alone in exploring for new oil fields and developing existing ones, to help replace the petroleum you'll use. Some 700 times this year, Standard drillers

will start bits spinning. As much as 16,000 feet of pipe may follow the bit before oil is found or the well is abandoned. Either way it's a costly hole: drilling an oil well may run from \$125,000 to over \$1 million. And every one is a risk—only 1 out of every 9 wells drilled in the U.S. in a promising but unproven area turns out to be an oil producer. Yet new sources of oil must be found to keep our nation's supplies from dwindling. Risking "dry holes" is the only way to find them. So the 125 "dry holes" we drilled last year are good evidence of the job Standard does to help keep you on wheels.

Standard plans ahead to serve you better

Spring Wheat Shows Big Response To Brea Aqua Ammonia Plus Sulfur

SHALLOW DRILL APPLICATION of Brea Aqua Ammonia minimizes soil and seed bed disturbance, conserves soil moisture, cuts time and equipment costs.

OUR DRILL APPLICATION RIGS are doing a nice job for customers these days, and naturally we are well equipped and ready to handle more customer acreage. Things are happening so fast in the fertilizer business that I know we can save you money and do a better job if you will let us help you with your nitrogen needs.

BREA AQUA AMMONIA stores well in the soil, and because of its long lasting qualities can be applied successfully during spring ploughing for winter wheat. Many of our grower customers save considerable time and money by combining application with other cultivation operations.

PEAS AND SWEET CLOVER also show a good response to Brea Aqua Plus Sulfur. Our field service men will be glad to work with you on programs for these important crops.

More and more local grain producers are boosting yields and profits with Brea Aqua Ammonia Plus Sulfur (18-0-0-2.) Both experiment station and grower tests show remarkable response of Northwest grain to Brea's low-cost, high-performance nitrogen solution with sulfur added. Brea Aqua Ammonia Plus Sulfur is a "natural" for grain. It combines speedy, mechanized fluid handling with shallow drill application which soaks nitrogen and sulfur into the soil at just the desired number of pounds per acre. Shallow "soak-in" application of Brea

Aqua at depths of only 4" keeps maximum moisture in the soil and places nitrogen where it is immediately available for germinating spring wheat. Nitrogen closer to the surface boosts young wheat when it needs it most and gets it off to a fast healthy start.

For more information and help in planning your nitrogen schedules for spring grain... call us today. We'll be happy to show you how Brea Aqua Plus Sulfur pays for itself over and over again. You'll like our fast service, low cost, and the big pay-off in crop response.

Just call us and we'll come out and show you how Brea Aqua Ammonia can make more money for you.
