"JIM BO" IT SWIMS

JIM BO—the most sensational invention in the history of fishing—the artificial minnow that swims. No more live bait to buy. This is the lure sensation of the 20th century.

IT SWIMS—no springs, uses no fuel; it swims as long as you leave it in the water. Swims by unique process of balance and gravity. Fish any desired depth—in lake, stream, gulf, bay. Any fish that will strike a minnow will strike JIM BO. This is no gadget. Looks and swims like a live minnow.

This is the lure of all lures—beautiful silver leaf plastic. Buy one for your friends also. Satisfaction guaranteed. Send $1.00 only, for each lure. Send check or cash. We pay postage. Sold by mail only.

Brea aqua news

Warren Wilkinson says

DID YOU KNOW, THAT: Barley figured at forty dollars a ton needs ONLY a gain of 200 lbs per A. to pay for Brea Aqua Ammonia applied to the soil at the rate of 30 lbs. nitrogen per A. This includes cost of applicator and operation. If barley increase were only 400 lbs per A. (many increases have been much larger) a farmer would receive income double the cost of fertilizing.

* * *

OUR DRILL APPLICATION RIGS are doing a nice job for customers these days, and naturally we are well equipped and ready to handle more customer acreage. Things are happening so fast in the fertilizer business that I know we can save you money and do a better job if you will let us help you with your nitrogen needs.

* * *

BREA AQUA AMMONIA stores well in the soil, and because of its long lasting qualities can be applied successfully during spring ploughing for winter wheat. Many of our grower customers save considerable time and money by combining application with other cultivation operations.

* * *

Spring seeded grains such as barley or wheat benefit from Brea Aqua Ammonia because: As a nitrogen solution it goes to work for you even in dry or cool weather.

Barley Increase of 200 Pounds Pays For BREA Aqua Ammonia Applied

SHALLOW DRILL APPLICATION of Brea Aqua Ammonia minimizes soil and seed bed disturbance, conserves soil moisture, cuts time and equipment costs.

More and more local grain producers are boosting yields and profits with Brea Aqua Ammonia Plus Sulfur (18-0-0-2.) Both experiment station and grower tests show remarkable response of Northwest grain to Brea's low-cost, high-performance nitrogen solution with sulfur added. Brea Aqua Ammonia Plus Sulfur is a "natural" for grain. It combines speedy, mechanized fluid handling with shallow drill application which soaks nitrogen and sulfur into the soil at just the desired number of pounds per acre.

Shallow "soak-in" application of Brea Aqua at depths of only 4" keeps maximum moisture in the soil and places nitrogen where it is immediatelyavailable for germinating spring wheat. Nitrogen closer to the surface boosts young wheat when it needs it most and gets it off to a fast healthy start.

For more information and help in planning your nitrogen schedules for spring grain . . . call us today. We'll be happy to show you how Brea Aqua Plus Sulfur pays for itself over and over again. You'll like our fast service, low cost, and the big pay-off in crop response.

Just call us and we'll come out and show you how Brea Aqua Ammonia can make more money for you.
