

**Moro Personals**

Mr. and Mrs. A. S. Johnson enjoyed the holiday week-end by driving over some familiar roads of yesteryear. They crossed the Columbia and visited the Sam Hill museum and then headed for the John Day country where they visited numerous spots of interest, finally concluding their outing at Clarno before turning the car homeward.

Vernon Van Gilder of Wasco is a patient at a The Dalles hospital, to which point he was taken Saturday suffering with virus pneumonia. His condition was improved the first of the week.

Wily Knighten Jr. and his sister, Mrs. John Miller of Seattle, spent the week-end with their parents, Mr. and Mrs. Wily Knighten Sr. The young people visited lone while in this vicinity.

Here for a vacation visit are Rev. W. W. Gearhart and family of Ojai, Calif., who arrived Thursday evening and are the guests of Mr. and Mrs. Darwin Van Gilder. An ardent fisherman, Rev. Gearhart is out on the Deschutes today with Van Gilder in quest of steelhead. The visiting minister, former pastor of the Moro Community church, will occupy the pulpit at that church at the 11 o'clock service July 10.

Mr. and Mrs. Lloyd Hendricks went to Camp Sherman for the weekend, visiting his mother on the way home.

Mr. and Mrs. Neil McIntyre made a trip to Sacajawea Park to celebrate the 4th of July.

Mrs. Jim Taylor has just returned from a month's visit in Anderson, Mo., bringing with her, Jim's mother, Mrs. John Taylor, who will stay with them for a few weeks.

Among the many Sherman county people spending the Fourth of July holiday weekend in distant parts were Mr. and Mrs. R. B. Hoskinson, the Paul Goddards and Doris Amidon, who joined the mad throng at Seaside.

Mr. and Mrs. Demerest Schmitt, daughter Frances, and his parents of Portland visited the Joe Peters family over the week-end. On the 4th they picnicked at Tygh Valley together with Mr. and Mrs. A. Douma, Mr. and Mrs. A. J. Brown of Shanks, Mrs. Eva Landry and Mrs. Geiter of Portland.

Mr. and Mrs. Vernon Flatt with the Bill Flatt family spent the holiday at Bend fishing and attending the pageant.

Mr. and Mrs. G. Douma made an overnight trip to Lakeview and Klamath Falls, by way of Burns, returning home through Bend.

Mr. and Mrs. Glenn Shoemaker and family, with the Joel Hammond family, camped near Rock Creek dam during the week-end.

Mr. and Mrs. Orlov Martin with his brother, Roy Martin and wife of Heppner went to Wallowa Lake over the week-end.

Mr. and Mrs. Bud Powell, Judy and Marilyn, attended the water pageant in Bend, Sunday.

Visitors at the Bill Roos home during the holidays included their daughter and family, Dr. and Mrs. Fluke of Eugene, and their son and wife, Mr. and Mrs. Robert Anderson of Vancouver, Wash.

Visitors at the Harry Pinkertons during the 4th of July week-end were their daughter and son-in-law, Mr. and Mrs. Jarvis Black,

with their two children from Portland. The young grandson, Gregory, 5, remained to enjoy ranch life for a few weeks.

Miss Nina Belshee has returned from San Francisco Theological Seminary where she attended summer choir school for two weeks.

Guests of Mr. and Mrs. Mac Hall on the 4th were Dr. and Mrs. John Gilhousen of The Dalles. Mrs. Gilhousen is a sister of Mrs. Hall. Mrs. Al Fox, 74, Grass Valley resident for the past four years, passed away in an Oregon City hospital Saturday evening. Funeral services were held Wednesday July 6 at the Peak Funeral Home in Milwaukie, with interment in Lincoln Memorial Park.

Mrs. Ralph Busse gave a coffee hour stork shower Thursday morning for Mrs. Liody Wooderson. Coffee and fruit salad were served after which the guest of honor opened her gifts. Those attending were Mrs. Andrew Paulsen, Mrs. Claude May, Mrs. George Giesler, Mrs. William Rodda, Mrs. Jerry Disch, Mrs. Mollie McLachlan and Mrs. Ruth Fields.

By "Tommy" Thompson

While at summer school the 4-H students had classes which they attended. A few of these were: Jam Session, in which they learned how to make jam; Yeast Breads, in which they learned points on bread; and Sugar Tricks, in which we learned some points on how to bake new types of cookies and ways of decorating them. I feel that everyone including myself that attended 4-H summer school enjoyed themselves and learned something new. The 4H students met other students with whom they became acquainted and they enjoyed most of the classes they attended.

"Ala" the new processed wheat food, made from Oregon and Washington wheat, is now on the market. The Oregon Wheat Growers League and Wheat Commission four years ago started pushing towards production of this new product that uses our local wheat. The Fisher Flouring Mills, Seattle, is now producing this product in quantity. Look for the new processed wheat food on your local grocer's shelves. Many folks have tried the new product over the past year or two from supplies obtained in California, now it is readily available at grocers and should open a good market for large quantities of Northwest grown wheat.

Weed control as a county conservation practice under the ACP program will not be approved for 1956. The Department of Agriculture has concluded that weed control measures are part of normal crop production operations and that ACP funds should not be used for this purpose. The ACP program is administered through the Agricultural Stabilization and Conservation committee.

We would be interested in hearing of any heavy grasshopper infestation throughout the county. Last year the grasshopper population was quite heavy on some of the range land, but none had invaded the crop land area. When infestation becomes quite severe control measures need to be taken, otherwise serious damage can occur.

Morrow county had quite a heavy infestation last year and they did considerable control work. This year they estimate a hundred and fifty thousand acres are infested and they have begun to invade some of the crop land area. It is reported that they have attacked some grain fields, especially spring grain, and fields look like hail stones have hit the field where the stems have been cut off by these grasshoppers.

Weeds are one of our most serious problems today and will be in the future. One of the most common methods of getting serious weeds into an area is transplanting of them by home gardeners. Recently I visited a family that had located a rather pretty wild flower and had transplanted it to their garden. It turned out that this plant was a Dalmatian Toad Flax, which is a perennial weed of serious consequences in some areas, it looks somewhat like a snapdragon and is quite a rapid spreader in crop land.

Folks should always be on the guard for plants that are unknown to them, and one should be very careful in transplanting plants from roadsides or forests into our county. Plants that are unknown to you should be identified and determined how serious a plant they are.

Mediterranean sage, a range-robbing plant that cattle won't eat, has taken over many thousands of acres in some of the Eastern Oregon rangeland. Folks with range should be on the lookout for this plant. The plant which is a woolly sage green cluster of broad basal leaves, is similar in appearance to the more common mullein. Plants often grow one foot in diameter and one to two feet high on good soil. The plant has a branched flower stalk in contrast to the single spike stalk of mullein. Unlike the mullein leaf the sage leaf is netted with veins

and has a sawtoothed edge.

Mediterranean sage is a bi-annual that forms its broad-based rosette the first year, and throws up its flower and seed stalk the second year, then dies. 2,4-D will control the plant satisfactorily.

Farmers who have cattle and who have not made use of the self-treating devices or back rubbers made with cable or chain, or barbed wire and sacks treated with insecticides are missing a bet in the horned fly control this summer. Many farmers in Sherman county and throughout Oregon now are using this simple device to assist in the fly control.

Chemicals for use on back rubbers are about the same as those recommended for last year. DDT, Methoxychlor or Toxaphene are desirable materials to use for these back rubbers. The emulsion form of these insecticides is preferred, these emulsion forms are diluted for use with stove oil or diesel oil, but not with crank case or lubricating oil.

These materials usually come 25% emulsifiable concentrate which contain two pounds of active ingredients per gallon. To make a 5% solution which is recommended mix one quart of the 25% concentrate of these materials to four quarts of stove or diesel oil. Generally, one-half gallon of the 5% material will treat about 15 or 20 feet of sacking for the first application. A quart of insecticide should be sufficient for each succeeding treatment to follow at about three week periods, or as needed. Constant use of the back rubbers throughout the horn fly season will aid materially in loss control for this coming winter.

Pat and Larry Kaseberg lost four head of three to four month old calves with blackleg this spring. Generally, blackleg doesn't occur before six month age, so this loss is of quite a bit of importance. The Kasebergs had planned to vaccinate during the first week after Larry returned from college, and the calves died the week before.

Moro Lodge No. 113 I.O.O.F.

Meets 1st and 3rd Tuesdays in I.O.O.F. hall. Transient and visiting brothers are cordially invited. John Shipley, N. G. Leo Watkins, Secretary

Lupine Rebekah Lodge No. 116

Meets 2nd and 4th Tuesdays of each month. Visiting members welcome. Vada DeMoss, N. G. Jo Gentry, Sec.

Bethlehem Chapter No. 78, O.E.S.

Meets 1st and 3rd Thursdays in each month. Visiting members invited. Moro, Oregon. Catherine Thompson, W. M. Naomi Van Gilder, Secretary

Eureka Lodge No. 121 A.F. & A.M.

Meets on the 1st and 3rd Thursday evenings each month. Visiting members cordially invited to meet with us. Frank Sayrs, W. M. Clyde Gillmor, Secretary
