## These Things We Note

By Giles L. French

The political bug bites early and some of the more ambitious have been looking at the 1956 calendars already. The late starters may be better.

T T W N  
If consumers were organized they might get some advantage from crop surpluses.

T T W N  
By the time a government has made life easy for 50 million people there's 100 million of 'em.

T T W N  
Obesity statistics show that too many women believe that the way to a man's heart is through his stomach.

T T W N  
The best government for me, says the wise man, is the one that keeps my dollar worth 100 cents.

T T W N  
E. R. Jackman, Oregon's grass man, recommends that farmers put at least half of their diverted acres in soil conserving crops and that the government make a payment toward that. Sounds constructive.

T T W N  
The man who made \$3000 15 years ago now makes \$6000. That would be prosperity except that he can buy about the same things he could before.

T T W N  
Deer hunters, we read, have been responsible for part of the drop in meat prices. Pshaw, we always thought they ate more than they killed.

T T W N  
This is a week worth remembering: a Sherman county saddle horse went to Hollywood.

T T W N  
No one had so close a touch with Wasco county history as Judge Fred Wilson. His father was circuit judge, congressman, his uncle was a candidate for governor and lawyer, Judge Wilson, himself, a pursuer on the river in the days when freight went that way. He knew about it all and was a part of much of it.

T T W N  
The East Oregonian has been publishing some appropriate historical sections celebrating the 75th anniversary of the incorporation of the city of Pendleton. It was quite a town in 1880 and had a round-up every day instead of once a year.

T T W N  
Pretty soon it will be possible to fly around the earth and get back before you started.

T T W N  
The lady of the house now takes more time off to get her hair fixed than she used to get to put out the family wash.

T T W N  
Prosperity and old age have about the same effect on many people. Groggish people. Work less, get lazy, talk too much about themselves, restrict their outlook.

T T W N  
If you want a little fun read the prognostications of football games after the games are over; if you want to have a lot of fun keep the pages of political speculation now being printed until November 1956.

T T W N  
The Russians say that now they have a policy of "each shall produce according to his abilities and receive according to his work" which sounds like pure capitalism beside the Marxian concept of "each shall produce according to his abilities and receive according to his needs." Anyone needs a lot of faith in the human race to think the latter would work.

T T W N  
No problem is settled until you have settled it yourself.

T T W N  
It has been trying to rain in Sherman county with the kind of success that made farming so precarious an occupation in the pre-1940 period. By which old timers will recognize a mere sprinkle.

T T W N  
We are sure that if Portland tries hard enough it can alienate the up-state about the PL. After all it is their money they are spending and if they don't want to attract the up-state, the up-state can go elsewhere.

## Goldendale 14, Moro 0 Story of First Defeat

The Moro high school boys lost their first game of the season Friday on the home field to a stronger Goldendale team which scored 14 while holding the local boys away from their goal line.

Goldendale's passing was the key to its success as they completed three quarters of their attempts. Moro has not met a team with as much ability at passing and could not stop them. A 60 yard pass and other long passes accounted for the scores.

The Moro line was able to hold a part of the time but was not strong enough to push over a touchdown when deep in Goldendale territory.

Moro goes to Heppner this Friday to tangle with the strong Heppner team and continue a rivalry that has brought some close games to the mid-Columbia area in the past. After that the boys return to the home field the next week to meet Maupin.
