**House Cleaning Time**

Whether it's cold or warm the women get to thinking about house cleaning every January or February. Whether it is a sign of spring or not we wouldn't know but in this country it is a sign of January and February.

The wall paper samples are rolled out so women can sit in the sun and look at them and hold them this way and that trying to figure out how they'd look on the master bedroom or the kitchen wall.

There's many kinds of paint on the shelves in the new tints and colors. There is Kemtone if you like it and rubber paint and other wall covers to choose from.

While there's manpower going to waste in the living room's biggest chair it seems a proper time for the housewife to get the house to shining for the bright springtime that surely must be coming pretty soon.
