

Gene Knott Playing Tackle For East Team In "B" Shrine Game Saturday Night

The East All-Star football squad went through its last heavy workout Wednesday under lights in preparation for the Shrine hospital benefit game in Pendleton Saturday.

devoted to signal drill, punting, and passing, according to East Coach Jim Conroy.

Coach Conroy announced a tentative starting lineup for the game with the West All-Stars, listing both offensive and defensive units.

On the offensive unit at ends were Bob Crouser, Elgin, and Dale McCulloch, Merrill; at tackle, Eugene Kott, Kent, and Norm Oliva, Malin; at guard, Dick Cantrell, Union, and John Knight, Umatilla; at center, Jerry Woods of Kinzua.

In the offensive backfield Conroy listed Harry McKinney, Union; Richard Youngs, Culver; Glen Stayskal, Malin; and Ladd McGowan, Pilot Rock.

Backfield changes for the defensive unit are Ray Johnson, Malin; Sam Clack, Union; and Allen Wilson, Imnaha. McGowan will switch to guard along with Norm Kotz of Joseph, for defensive chores.

Also slated for heavy duty are lineman, Edward Brosnan, Heppner; Doug Johnson, Enterprise; Jack King, Weston; Bill Lozier, Echo; Robert Parker, Adrian; Richard Siemens, Chiloquin; Alan Tolar, Echo; and backs Veryl Harrison, North Powder; and Earl Torris, Huntington.

Business Can't Stand Government Habits

An easy way for any business to go broke would be to adopt Uncle Sam's system of budgeting and accounting, says the chamber of commerce of the United States.

Under this system, Congress is appropriating money for a single year that won't be spent for some time to come. The reason is that so many federal expenditures are long-term—stretching over a period of years. Foreign aid programs and purchases of military equipment that takes more than a year to design and build, are samples.

Hence, the chamber points out,

County Ramblin's

County Agricultural Agent

vast sums accumulate in the federal departments far in excess of a single year's expenditures. This money doesn't revert to congress. It stays with the departments, beyond the control of congress.

The figure for these unexpected appropriations for the year ending June 30, 1956 is estimated at \$53.9 billion.

Government spending is now taking only 19 per cent of the national income in comparison with the heavy 25 per cent cut recorded in fiscal 1953 under the Truman administration.

Reason for satisfaction is found in the news that spending in fiscal 1957 will be reduced to \$388 per capita lower than the fiscal year of 1953.

Grain waterways in both wheat and barley ground do a good job in reducing ditch erosion. Seeding should be done as early as possible to allow more growth for winter protection.

A hard white wheat designed as Rex-Rio No. 41 will be considered for release the third week of August during a tri-state meeting in Walla Walla. If released, it will be handled the same way as Omar when released a year ago. Sherman county farmers interested in production of this variety under Oregon certification standards, if released, will need to make application through the county agent's office. Allocation will be handled by the State Allocation committee.

A limited amount of Foundation Omar wheat is available this fall. Allocation of this seed to growers will be considered by the State Allocation committee rather than by the local committee as bulk of the Omar available has been. This seed will be used to continue to produce certified seed on the experiment stations and farms interested.

Earwigs are a frequent problem around the home at this time of year. DDT or Malathion dusts applied around the edges of buildings, old wood piles, or anywhere they might hide during the day will be effective in controlling them. Baits are effective as usual as well as folded newspapers or tar paper, which should be destroyed each morning.

A fertilizer trial on irrigated alfalfa on the Phil O'Meara field north of Wasco gave some interesting results this past summer. Applications of phosphorus, sulphur, and a minor element, boron, were applied. Sulphur gave the cheapest hay increase with the combination of phosphorus and sulphur giving the highest yield. An application of 40 pounds of actual sulphur gave a half ton increase over the check plot. An application of 80 pounds of phosphorus and 40 pounds sulphur gave 3/4 of a ton increase. Generally in Sherman county irrigated alfalfa should receive an application of sulphur in the fall, and will benefit materially from this application.

One hundred fifty-one boys and girls participated in 4-H club work during the 1955-56 year, 51 of these were boys and 100 girls. These boys and girls carried 233 4-H projects.

The school year is rapidly approaching and it is about time to start new 4-H projects. Parents and their boys and girls should give some consideration at this time as to what projects the boys and girls are going to carry for the coming year. Club members planning to have calves for the coming year should give thought to securing those calves to be taken to The Dalles show next

June at this time. The earlier start one gets the better condition the calves will be at that time.

Sherman county farmers that have applied to obtain an allocation of the new wheat OMAR have been asked to make payment for this seed at this time. Collections are being made through the Sherman Cooperative Grain Growers, Wasco, prior to securing the seed from Umatilla county. The Sherman Cooperative Grain Growers are handling the storage and distribution of the seed and as soon as seed becomes available upon payment the farmers can get their allocations from the Coop.

If you have not paid for your Omar seed, please do so immediately to insure availability of this seed ahead of seeding time.

Good lawns just don't just happen, they are planned. Early fall, the 1st of August and first part of September, is an ideal time of year to make plantings of permanent lawns in this area. Blue grass lawns are ideal for Eastern Oregon conditions. We prefer a single species of grasses for a lawn planting rather than a grass mixture. Merion Bluegrass, although a little high in cost, makes a very excellent turf. Merion Bluegrass requires a little less water than Kentucky Bluegrass and does not require as much mowing and has a deeper, richer green color that is extremely beautiful. Seeding of Bluegrass needs to be made at about 4 pounds of seed per thousand square feet. A small application of fertilizer is desirable. Application depends upon the type of fertilizer used. White clover causes clothes stains and attracts bees. Most people do not want white clover in a lawn, but when used should be applied at about two ounces per thousand square feet.

I have a seeding in the same area of Kentucky and Merion Bluegrass and folks interested in looking at these and comparing them are welcome to do so. Kendrick Dunlap, also has seeding of Merion Bluegrass.

AUTOMATION IS THE WORD FOR IT

Astounding, electronic-controlled production lines are revolutionizing manufacturing methods. Automation promises better living, more leisure time to millions of Americans.

"AUTOMATION"

WORKS FOR YOU, TOO, WITH A MODERN, NEW ELECTRIC RANGE

MORE AUTOMATIC THAN EVER! Modern electric surface elements now feature thermostatic temperature control, too. And, of course, the automatic oven will tend your meals for you. You'll have more time for living, with a new electric range.

FASTER THAN EVER! New miracle burners that heat in five seconds; respond instantly to temperature settings. Modern electric cooking is quick, safe, clean and cool.

EVERYTHING TASTES SO GOOD! Food cooked electrically is a particular treat. Electric heat cooks *all the way through* yet reduces shrinkage and drying-out. Food comes from your new electric oven moist, yet thoroughly done... brown, yet tender and tasty.

AND ECONOMICAL IN THE BARGAIN! A few cents' worth of Pacific Power's dependable electric service will do your family's cooking for an entire day. Low electric rates from Pacific Power & Light bring you modern living at the lowest possible cost.

Your appliance dealer has a wide variety of automatic electric ranges, including the built-in range with eye-level oven and surface units arranged to suit your kitchen convenience. (Ask about our Time-to-Revire Plan—the easy-pay way to modernize the wiring in your home.)

PACIFIC POWER & LIGHT COMPANY

LIVE BETTER.....ELECTRICALLY!

"I Want a Sandwich"

by FRANCES FIELDS
Home Economist
Oregon Wheat League
Lewis Building
Portland 4, Oregon

A very familiar cry in American families. At picnics, parties, mealtime... particularly during the summer months, sandwiches just fit the bill. There's economy, ease, versatility and good taste in sandwiches. Especially when the flour blend includes fine Oregon soft wheat. Sandwiches made from enriched bread are high in nutritive value, too, and are so easy to prepare.

A NEW TWIST to your breakfast plans are these tempting French Cream Sandwiches. With fresh raspberries, bacon, milk or coffee, a real treat in the morning.

FRENCH CREAM SANDWICH
3-ounce pkg. cream cheese
1/2 cup drained, crushed pineapple (5-ounce can)
6 slices enriched bread
1 egg beaten
1/4 cup milk
Dash of salt
1/4 cup butter

Make sandwich filling by combining cream cheese and pineapple. Mix until creamy. Filling makes 3 sandwiches. Cut each sandwich in half diagonally. Combine egg, milk and salt in shallow dish. Dip each side of sandwich into egg mixture and brown quickly on both sides in butter. Makes 3 sandwiches.

Here's a real "hopper" that makes a meal—Champion Ham Sandwich Bake.

CHAMPION HAM SANDWICH BAKE
8 slices enriched bread
Butter
4 slices boiled ham
4 thick slices tomato
4 slices American cheese
1 1/4 cup condensed cream of mushroom soup
1/4 cup milk
Paprika

Butter bread. On 4 slices of bread place ham, then tomato and cheese. Cover with remaining 4 slices of bread. Cut sandwiches in half and place in a 9-inch baking pan. Combine soup with milk and mix thoroughly. Pour over sandwiches. Sprinkle with paprika. Bake in moderate oven (400°) 20 minutes. 4 servings.

Hot or cold, sandwiches are a summer menu mainstay. Particularly in August... Sandwich Time.

Oregon wheats make breads and crackers that are far superior in taste and nutritional benefits... just right in every way.
