Pack 571 of the Cub Scouts has three dens this year and they seem to be well organized as to plans and meetings. This month their project is puppets and they are already working on their programs for the Pack meeting. Den 1 has as den mother Mrs. Anna Jacobson and Donna Lane as assistant. They have the eldest group comprised of Gary Jose, Ronnie Johnson, Mike Lane, Erling Jacobson, Donnie Watkins and Raymond Pearson. Mrs. Pearson is den mother and Mrs. La-villa Morrison assistant for den number 2, with the next age group made up of Jay Gleason, Michael Patrick, Doug Dutton, Allan Morrison, David Richelderfer, Kent Thomas, Greg O'Meara and Bruce Lane. The youngest group are Leroy Long, Dennis Buckley, Corlin Fowler, Loren Macnab, Joe Thomas, David Jacobson and Joe Brock. Their den mother is Juanita Long and assistant is Edith Brock. The boys all take turns furnishing refreshments for their own group.

Oil Progress Week* lasts all through the year at Standard

Finding new oil is vital. By 1965 America's needs will rise 20%. To locate additional oil deposits, Standard geologists explored 33 states and 40 countries last year on foot, in planes and even in specially designed "swamp buggies" (above). As a result, we found substantial new reserves for your future use... this is Oil Progress.

Producing oil for more and more uses led us to far places... even to man-made "islands." Last year, in the Western Hemisphere alone, Standard drilled 107 test wells - many in remote spots. But even with new sources harder to find we added nearly three times as much oil to reserves as we took from the ground... this is Oil Progress.

Standard puts oil to work for better living in hundreds of products... asphalt roads for safe, comfortable driving; gasolines, oils and tires; wrinkle-resistant fabrics; stronger plastics; detergents to make housework easier; wax for candles and food cartons; plant foods; even cosmetics, salves and ointments... this is Oil Progress.

Research in oil promises new products... plastics strong as steel; new synthetic fibres; better insecticides. Even commercial atomic power is closer with new Standard-developed oils. In atomic machinery they last two to three times longer under radiation that makes some petroleum oils hard enough to drive nails... this is Oil Progress.

*October 14 to 20 is Oil Progress Week, a reminder that 15,000 oil industry researchers produce an average of six new inventions every working day.
