April 8 with all members present. We were pleased to have Mrs. Hansen with us. During our business meeting we were interested in what she told us about our cookies and exhibiting them at the county fair.

We made apple crisp and to many of us that was quite a new dish to make, but we all enjoyed doing our share. At our next meeting we will learn how to prepare fresh fruit.

### How Standard's explorers help find the 830 gallons of oil you'll need this year

Oil geologists probe the ocean floor for clues to new oil fields

**THE OCEAN FLOOR IS THE NEWEST FRONTIER** in our search for oil to help meet the growing demand of motorists, home owners, farmers, industry and the Armed Forces.

Last year Standard's scientists explored millions of acres offshore and on land in the Western Hemisphere. Once again we discovered new oil deposits that will help supply the 830 gallons of petroleum everyone in the U. S. will use this year... and the 1000 gallons they'll need by 1965.

With oil becoming more difficult and expensive to find, Standard's investment in exploration is increasing... \$119,000,000 last year. That's one way we can find new oil to help keep ahead of the nation's growing need for products from petroleum.

Progress in the West means...

**U. S. oil reserves must continue to keep pace with rising demand**

Daily U. S. oil consumption has risen from 5 million barrels in 1946 to 9 million barrels in 1956 and is expected to reach 12 1/2 million by 1965.

# OLDSMOBILE

POWERED TO THE WESTERN WAY OF LIFE

**'You'll like it even better when you drive it!'**

Neighbor: Say, your new Olds sure looks like a lot of car!  
Olds Owner: That's nothing, wait'll you take a ride.  
(A few minutes later)  
Neighbor: Man-oh-man, where'd all that power come from? I've never felt anything like that before!  
Olds Owner: That's Oldsmobile's new J-2 Rocket Engine!  
Neighbor: What's that? Tell me how it works.  
Olds Owner: When you're driving under ordinary conditions, it uses only one carburetor. That means economy with a capital E. But when you need a sudden burst of power, for safety's sake, you just press the accelerator three-quarters of the way down—and two additional carburetors cut in!  
Neighbor: In other words, with J-2, you can have economy when you want it and power when you need it. That's for me!  
Olds Owner: Better see your Olds dealer. He's expecting you!
