## How Standard put \$4,282,372 to work every day last year

...and what this meant to people in the Western Hemisphere

**Port of Spain, Trinidad** Exploration for possible new sources of oil covered millions of acres in the U.S., Central and South America, Canada, Alaska and the Bahama Islands. Seeking oil for your future use is one of our biggest expenditures... \$324,789 on an average day. Again last year we found more new oil than our wells pumped from the ground.

**Gulf of Mexico** We completed better than two new wells a day... 101 of them off the Texas and Louisiana coasts where drilling costs up to six times as much as on land. An average day's bill for drilling came to \$431,516. This huge expenditure was necessary because a well may cost from \$125,000 to over \$1,000,000 and one out of every six wells drilled was dry.

**Perth Amboy, New Jersey** Standard and its operating companies from New Jersey to California, from Alaska to Venezuela hired 2,485 new employees last year. Our working family grew to a new high of 38,854. The wages and salaries they earned added to the economic health of communities in 46 of the 48 states and in many other nations of the Western Hemisphere.

**U. S. A.** Our Federal, State and other taxes amounted to \$325,424 a day... enough to buy a helicopter for rescue work, or pay for complete training of three jet pilots every day. In addition to paying these direct taxes, in 1936 Standard collected for and passed on to Municipal, Provincial, State and Federal agencies \$193,460,383 as sales and gasoline taxes.

**Vancouver, British Columbia** On an average day we spent \$517,446 to keep equipment in repair and up to date... extending a wharf at Vancouver, adding to a refinery in El Paso, Texas or a pipe line to Boise, Idaho. This work provided employment for thousands of construction and maintenance workers as well as for the employees of firms supplying equipment.

**El Paso, Texas** Purchases of crude oil took \$949,853 a day in areas such as El Paso, Texas and Bakersfield, California. Even though our own Western Hemisphere production was at a new high, we bought oil from many small and medium sized producers. To these people and their employees Standard was a good customer and an important source of income.

**Salt Lake City, Utah** Our 738 employees in Utah were among the total of 38,854 Standard. Oilers who participated in benefit plans at the rate of \$119,082 a day. One was our Stock Purchase Plan to which Standard added nearly twice the amount an employee deposited. Some other plans included sickness benefits, retirement pay and Company-paid life insurance.

**Bajo Grande, Venezuela** Increasing refinery output and improving the quality of our products are never-ending jobs. Last year one of our operating companies completed a new asphalt refinery in Venezuela and plans were announced for a future refinery near Everett, Washington. New equipment for our manufacturing plants called for investing \$107,741 a day.

**Portland, Oregon** Although 43.5% of Standard's owners live in the West, Alaska and Hawaii, you'll find them almost everywhere. Stockholders include colleges, churches and banks, but most of them are individuals. Of every dollar we took in, 6-6/10 cents or \$285,028 a day was distributed among Standard's 137,381 stockholders who own the Company.

WHAT HAPPENED TO THE \$1,567,348,030 STANDARD TOOK IN LAST YEAR can best be told in terms of people... many people in many lands. For example, Standard was a customer of more than 10,000 Western firms last year. One major item such as a refinery unit required the services of people in scores of other industries.

Moreover, many of the 1250 products we made from petroleum were raw materials for other manufacturers... from paints to cosmetics, from detergents to synthetic fabrics. Thus you'd never be able to count the people who benefited directly or indirectly from the \$4,282,372 Standard put to work every day last year.

Through affiliated companies operating in the Eastern Hemisphere, Standard helped carry an expansion and development program that provided better living for people in Europe, Africa, the Middle East and the Far East.
