What have we here? A dinosaur skeleton? Or a monster from one of those spooky movies the kids seem to like so much? Wrong both ways. These are pre-formed telephone cables. They're for the switching equipment that helps handle your calls. How are these "gentle monsters" born? First, telephone people hammer nails in just the right places. Around this pattern—sort of like a jig-saw puzzle—they run thousands of wires. In the end, the whole thing's ready to fit right into a phone system. By doing wiring jobs like this in advance, we can expand service faster—to meet your growing needs.

One of the nicest things about extension telephones is their convenience—as the lady shown above knows so well. When she's feeding baby, there's no need for her to run to answer the phone. She just reaches out and answers it. You can enjoy the same step-saving convenience with a phone in your bedroom, your den, or wherever you spend a lot of time. With nine decorator colors to choose from, the new phones are a joy to look at, too. After a single installation charge each extension costs just \$1.25 a month. So call our business office, Pacific Telephone.
