"Flex-O-Glass has made our porch a year 'round, livable room. The children love it."
"Here's an inside view of our large screened porch. If you couldn't see the snow outside, you'd think it was taken in summer. What doesn't show is the crystal-clear Flex-O-Glass tacked over our screens—an invisible barrier between our home and winter. This is the second year we have used the same Flex-O-Glass. We expect it to last at least two years more. That means it will cost us only about \$15 a year to protect the rest of the house against drafts. We can leave our furniture on the porch the entire year and provide a warm, protected play area for the children. If you would like to use this letter to tell other homeowners how much they're missing by not using your wonderful Flex-O-Glass to protect their homes against winter weather, you have my enthusiastic approval."
