*Certain Self-Treatment Should Worry You, Too...*

Powerful and effective, many new drugs can produce remarkable results. Likewise, much damage can result from improper use or overdose. Dangerous immunities can develop. Permanent injury can be done — even life can be endangered.

For good reason, there are restrictions on the use of penicillin, Chloromycetin, certain sulfa compounds and other drugs without the care and prescription of a physician. When your health requires it, consult your Doctor. He will prescribe these new and potent remedies when he feels they are required.
