Cal Horn, your Telephone Manager

**COAST-TO-COAST PHONE CALLS BY SATELLITE.**  
Scientists of Bell Telephone Laboratories tell us that someday long distance calls may very well reach homes in Sherman County via man-made satellites.

Working under National Aeronautics and Space Administration's sponsorship, they carried on a two-way phone conversation between the Bell Telephone Labs in New Jersey and a NASA base in California via a "Project Echo" satellite. The signals carrying their voices were bounced off a 100-foot aluminized plastic sphere orbiting 1000 miles above the earth.

The Bell Telephone System has outlined to the government a plan to use about 50 satellites to provide communications between the United States and other parts of the world. Besides relaying phone calls, these satellites could also bring you live television from anywhere on earth.

**Election day, November 8,** is still a few days off. But it's not too early to make plans so you'll be sure to get to the polls. If you need transportation, now's the time to arrange with your friends for a ride. If small children keep you close to home, perhaps you can swap baby-sitting chores with a neighbor.

You can make these arrangements by phone... but that's not why I mention them. I just want to remind you that every vote is important. Be sure you cast yours November 8.

If we're to believe cartoonists, nobody enjoys telephoning as much as today's teenagers. I won't risk an opinion on that subject, but I think you'll be interested in our special telephone training program for young people.

It's called Teletrainer, and it's mighty popular in high schools. Last year, for example, nearly a quarter of a million high school students were trained with it throughout the Pacific West.

We make Teletrainer available free of charge to help young people learn how to use telephones correctly.

THE PRESCRIPTION PHARMACY

To pay for Knowledge is Often Real Economy . . .

Can you measure the value of an examination and diagnosis by your Doctor? The fee paid to him is not for work alone. It is also for his knowledge, for knowing what to do.

Likewise there are years of study and experience that are a part of every prescription dispensed. Consider this, and note that the pharmacist's fee for professional knowledge is but a small part of the moderate cost of your medicine.

*The unmistakable stamp of Greatness!*

In commerce, as in art, it is rare indeed that a creation emerges so inspired in concept and so flawless in execution that it is destined, from the very beginning, for certain greatness.

And yet, it seems not too soon to say that the Cadillac car of 1961 will take its place among the most memorable of the peak achievements of the automotive craft.

Its clean, classic form introduces a new look for the world's motor cars to emulate. There's a new proportion of glass to steel... a new "oneness" of contour and shape... an entirely new relationship of interior to silhouette.

Inside, the story is equally remarkable. Here is new roominess in every dimension. Head room, seat height, and entrance room, for example, have been notably increased with impressive results in greater comfort and luxury.

And as its beauty is... so its performance does—incredibly nimble and quick... smooth and floating... quiet and obedient in operation.

Cadillac's new engine is the very essence of controlled power... steering is feather light and sure... and its new ride seems to make the roadway vanish beneath the wheels.

This is one car you must see and drive for yourself. The facts are simply too numerous and too exciting to accept second hand.

It's the 1961 Cadillac—and we know you'll agree that greatness is written all over it.
