Helpful
HintsHOW TO
MAKE YOUR
HEATING
DOLLAR
GO FARTHER!

• Be sure your doors and windows are weather-stripped and your house is insulated. You'll be pleased with the savings you can make on your heating bill.

• Save heat by keeping the thermostat at a comfortable setting. It costs considerably more to increase the temperature of your home from 70 degrees to 80 degrees than it does to increase it from 60 to 70 degrees. You can also save by setting the thermostat lower at night.

• When fireplace is not in use, close the damper. You'd be surprised how much heat can escape through an open flue.

Reddy Kilowatt hopes these hints will help save you heating dollars. And remember, Reddy's always at your service for home comfort and convenience. Live better electrically.
