Peach Leaf Curl

Home garden peach leaf curl control is due. Sherman Countians having trouble with rolling and crinkled leaves should make a control fungicide application. First application should be applied now and the second a month later.

Lime sulfur, Puratized Agricultural Spray and TAG are the fungicides suggested for home garden use—all are liquid fungicides and are easier to handle than the preparation of Bordeaux mixture. To prepare 3 gallons of spray add 3 tablespoons of Puratized Agricultural Spray or 1½ tablespoons of TAG or 5 tablespoons of lime sulfur, to 3 gallons of water.

Reddy Kilowatt's Helpful Hints

HOW TO MAKE YOUR HEATING DOLLAR GO FARTHER!

- Make certain your house is well insulated, and that your doors and windows are weatherstripped. This cuts heat loss and gives you more value for your heating dollar.
- Try to keep drapes drawn and shades pulled at night and in rooms not in use because heat passes readily through window glass.
- You can save heat by closing off rooms at night where windows are raised. If the room has a separate thermostat, set it as near the outside temperature as possible.
- If your furnace has air filters, keep them clean. Dirty filters slow down air circulation and make your furnace work harder.

Reddy Kilowatt hopes these hints will help save you heating dollars. And remember, Reddy's always at your service for home comfort and convenience. Live better electrically.
