SCALE WATCHING IS AN EXCELLENT HABIT

Prescription  Pharmacist

A scale in every home might be very beneficial to personal health, for weight is an excellent guide to future well-being—and should be watched carefully.

There is no short-cut to weight control. With each person, it is an individual problem, and subject to personal discipline.

Normal living and eating are likely the keys to health. If over-weight or under-weight, see your Doctor. He is the one qualified to determine the necessity and prescribe for such treatment.

Only with his guidance should you engage in any weight control project.

HOW MANY OF THESE APPLIANCES WORK FOR YOU IN YOUR HOME?

This is the month; Now is the time.

This early warm spell is sure to set the housewife to thinking about changing something, moving the furniture, painting the kitchen, redecorating the living room. It's as regular as the sparrows at Capistrano.

We're ready for it. Have some very pretty designs of wall paper suitable for rooms to laugh in, rooms to sleep in or rooms to feel solemn in.

Paint, of course, rubber base paint in a line of colors reaching from just a little off white to dark purple and browns and blues and nearly every shade between. Really a fine line.

Then if you'd like some new cabinets to make work around the kitchen handier we can supply plywood. Oh, all kinds of boards, plaster, paper, anything that's made and there's lots made.

Come in and look it over.
