HOW MUCH?

Just How Many Dollars?

The amount of dollars wasted by inefficient rates of fertilizer is not known. We do know that too much fertilizer is sometimes applied to a crop. Not that it hurts the growing crop, but the crop does not efficiently utilize that extra amount of plant food.

Only with low cost soil testing and analysis will you know exactly how much fertilizer and what analysis to apply on your growing crop.

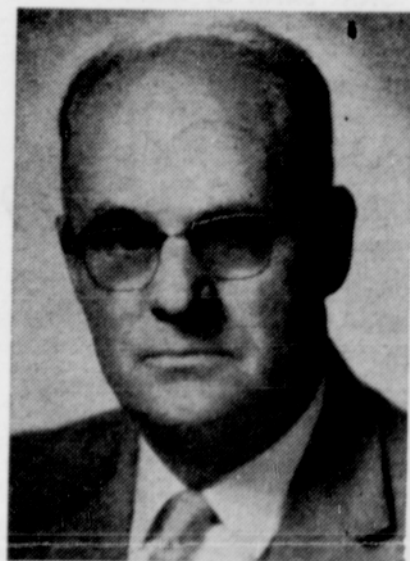

Don't guess on the amount of fertilizer you need. Take the low cost way and soil test before you fertilize.
