CUT VENISON THICK

Cut venison steaks an inch to an inch-and-a-half thick to retain more of juicy succulent flavor, advises Andy Landforce, OSU extension wildlife management specialist.

Juices in venison do not come from fat within the meat but from moisture within the tissues. When steaks are cut thick, more of the natural juices are kept making more tender, flavorful venison on the table.

From where I sit ... by Joe Marsh

Opportunity Comes Knocking

Right in the middle of harvest, Smiley Roberts' hired man hurt his shoulder. So it was a stroke of real luck when a stranger knocked on Smiley's door asking for work.

"You can start right now!" says Smiley. "O.K.," says the stranger, "but what about wages?" With that Smiley pauses and says, "Well, I guess I can pay you whatever you figger you're worth."

The stranger thinks it over for a minute, shakes his head, and starts to walk away. "Sorry, mister," he says. "It's just not worth it to work for that kind of money!"

From where I sit, a man who undervalues himself is bound to lose out in a lot of ways. But even worse is the man who undervalues other people. Chances are he's the kind of man who thinks only his own ideas are worth something—the kind of man who respects no opinion but his own. If he prefers tea, he's likely to object to your choice of coffee—or my choice of a glass of beer. Intolerance like this is no way to "reap" the rewards of good friendship.

Here's what PP&L customer Mrs. H. McCall says about electric living ...

"I use electricity as many ways as I can ... it's a wonderful help with the housework"

"I was amazed to find that we often use 17 different appliances in just the first hour of the day. But with four active youngsters, my biggest time savers are the washer and dryer ... in an average day I do three loads of clothes! Electricity helps me with dozens of chores, giving me more time to devote to my family."

Like thousands of other Pacific Power & Light customers, Mrs. McCall and her family live better because they make generous and effective use of modern electric service.

How about you — are you making full use of Reddy Kilowatt's helpful service?

In the typical U. S. home Reddy works 327 hours per month.

327 KWH

In the average Pacific Powerland home Reddy works 717 hours per month.
