Reddy Kilowatt's Helpful Hints

HOW TO MAKE YOUR HOUSEHOLD DOLLAR GO FARTHER!

● Heating a house without weather stripping or insulation is like trying to carry water in a leaky bucket. Weather stripping and insulation keep heat inside where it does you some good.

● Save heat by pulling down window shades or drawing drapes at night because heat passes easily through window glass.

● Plan your clothes drying so that you can do a full load each time in your electric dryer.

● Clear the lint from your dryer often. Lint holds water and makes clothes harder to dry.

These are just a few of the ways you get your biggest value from dependable PP&L electric service. Use it often, use it efficiently. Live better electrically!

Here's what PP&L customer Mrs. H. McCall says about electric living...

"I use electricity as many ways as I can... it's a wonderful help with the housework"

"I was amazed to find that we often use 17 different appliances in just the first hour of the day. But with four active youngsters, my biggest time savers are the washer and dryer... in an average day I do three loads of clothes! Electricity helps me with dozens of chores, giving me more time to devote to my family."

Like thousands of other Pacific Power & Light customers, Mrs. McCall and her family live better because they make generous and effective use of modern electric service.
