**THE GREATEST MODERN MOVEMENT
 Toward Improved Health**

More than one-third of our nation's people voluntarily and freely pay for medical or hospital care in advance through cooperative insurance plans. This is probably the greatest voluntary movement toward improved health and welfare in the history of the world.

Every phase of this activity is laudable. The cooperation of industry and its employees, and the foresight of breadwinners to invest money in their families' health in advance of actual need, are evidence of progress. Active participation of the medical profession is evidence of its stature.

The desire for improved health, and the newly found personal pride and dignity of the individual are universal, and you may depend upon us, as upon your physician, in the achievement of these objectives for your family.
