Keith A. Mobley of Kent made the fall term honor roll at Oregon State University. To be eligible students must make a B-plus or better average for the term. Mobley was one of 72 students who made straight-A grades.

He is a senior in the school of education. Mr. and Mrs. Roy Belshee and Mr. and Mrs. Ernest Goodenberger were dinner guests of Mrs. Inez Thompson honoring the anniversary of the Belshees on Saturday January 20.

Sled riding kids and the few hady elders who tried it had a bad time during the recent snow. There wasn't enough snow in the first place and the temperature was down around zero and as soon as it warmed up the thin skiff of snow disappeared into slush. Heck, it may be another year before it can happen again.

Agreement has been reached between the Odd Fellows lodge of Moro and Roy Cameron of the Lorentz Bruum Co., of Portland about the remodeling and cleaning of the Odd Fellows building that was damaged early in December. The work will entail cleaning and some rebuilding, the extent of which has not yet been decided upon. But work will start immediately.

BORN To Mr. and Mrs. Don Miller Sunday, January 21 at The Dalles, a nine pound, two ounce daughter, named Pamela Ann.

Mr. and Mrs. Wendell Balsiger left Monday morning for California expecting to meet Mr. and Mrs. Collis Moore there to probably continue into Mexico for a few days in the sun.

Neil McIntyre's well pump rods pulled in two last week and it looked like a long dry spell on the McIntyre ranch but Glenn Wallace was able to fish the stuck end out in one try.

Mr. and Mrs. Orlow Martin are the lucky ones. They went to California to visit relatives in the middle of January and went over to Phoenix to see the Sherman countians there, missing all the cold weather.

Mr. and Mrs. Roy Rayon say they will have their newly done cafe open for business by Friday, new stove and other kitchen equipment, new floors, new booths, new lighting, new front doors, in fact, nearly every thing new and bright, including, says Roy, a new menu.

**Kent Home Extension Meets In Grass Valley**

The Kent Home Extension unit met at the home of Mrs. A. A. Dunlap Jan. 18. The business meeting was held in the morning. The Homemakers' Festival was discussed and Mrs. Carl von Borstel was appointed chairman of the decorating committee. The theme will be "A Woman's World."

After lunch the project on "Managing Money" was presented by Mrs. John Reckmann and Bertrude Buether. A study was made of the Family Life Cycle and the expenses of each area. Many interesting ideas were considered.

The next meeting will be at the home of Mrs. Byron Stark. The title of the project is "Accessories" and the leaders will be Mrs. Stark and Mrs. Don Maxwell. The date is 11 a. m. Feb. 8. Everyone welcome.

**Total Incomes Big Over Lifetime**

A surprising amount of money passes through the hands of most adults between the ages of 20 to 65. Estimate your average income and multiply it by 45 and this will give you an idea of how much money you will handle.

"Managing Money", especially how you handle yours, can be of vital concern to you and those dear to you, and was the subject of our January extension unit session.

The Moro Tuesday unit met at the Stan Coelsch home January 16 and Vada DeMoss presented the information available from OSU and led the discussion.

**Livestock Prices Steady**

Indicators that usually point direction of livestock prices in Oregon suggest improvement in lamb prices in 1962, but slightly lower average hog prices and about the same average prices for cattle as in 1961.

These are the conclusions drawn by S. C. Marks, OSU, after a careful study of the state and national situation. Oregon livestock price trends are influenced by changes in regional and national market supplies and demand.

Marks makes his observations in the Oregon Farm and Market Outlook report just published at Oregon State and now available in county extension offices.

On the national level, Marks says prospects are for continued strong demand for meat, with increasing military requirements and any other government purchases lending support to the markets. Red meat production should increase enough to provide consumers with about the same supply per person as in 1961, with the domestic supply supplemented by imports, mostly for processing.

Oregon cattle prices may move lower during the next two or three years as production is on the upswing and beef and veal output is increasing faster than the nation's human population. Marks points out. Cattle numbers have been increasing since 1957. The 1960 increase was less than one million head, but 1961 slaughter data indicated the buildup is being accelerated.

The rate of increase since 1957 has been in fairly close balance with population growth and, Marks says, if the increase of 1959 had been held to around 1 1/2 million head instead of going to 2.9 million, cattle prices for the past two years might have averaged higher.

In the light of population growth alone, some analysts believe cattle slaughter will have to be increased about 500,000 head a year just to maintain beef consumption per person.

The supply of feed grains and concentrates, while a bit smaller, is still plentiful. However, feed

grain price prospects are uncertain, but seem likely to be above the lows of the past two seasons, Marks said.

Perhaps it has happened to you. You've been sick, and your doctor hands you a prescription for one of the new medicines. When you get it filled and find out the cost, it may seem a mighty high price to pay. But think what that prescription may do for you . . . get you well, get you back on the job sooner and possibly even save your life. Actually, with the new and more potent drugs, many an illness costs less today than ever before. Twenty years ago, for example, hospital patients stayed an average of 14 days, as compared with 9 days average now. An appendicitis operation used to mean 3 weeks in the hospital . . . now it's usually 5 days. And pneumonia patients, if they survived, had to stay 3 to 6 weeks. Now they're usually home in a week . . . if they leave home at all! When you consider what today's more effective medical care can do for you and your family—in saving lives, speeding recoveries, preventing complications, easing worries—you appreciate what good value you're getting. In fact, prompt and proper medical care may well prove to be the biggest bargain that will ever come your way.—Reprinted from a copyrighted advertisement published by Parke, Davis & Company, Detroit 32, Michigan.
