Wild Geese Meet In Winter Quarters

Sunday, January 28, was Moro Day at Sun City, Ariz. when Rose Amidon, Christine Platt, Etha DeMoss were hostesses, serving a bountiful dinner at the DeMoss home. Present were Fred and Nina Hennagin, Free and Edith Crews, John and Joy Parker, Joe, Marie and Lawrence Peters, Orlow and Helen Martin, Floyd and Christine Platt and Theodore and Florence Johnston. Later in the afternoon dessert was served at the Amidon home just across the golf fairway from the DeMoss home. And talk about a real gab fest we really had one says Orlow Martin. John states the Martins were leaving for home Monday morning, Jan. 29.

Weather for the week has caused newcomers to think this is paradise and old timers to shake their heads in wonder. Nights have been frosty but the days sunny enough for spring. Householders are looking for garden seed displays and are digging up the ground for sweet peas, housewives have that look in their eyes that presages spring cleaning, small boys are looking for their marbles and baseball mitts and small girls are wearing their best dresses to school. There may be some more cold weather and there'd better be for it is too early for spring, but rice, rice.

COUNTY RAMBLINGS

Sherman county cattle generally is short of Vitamin A. This comes about due to our natural environmental conditions—dry summers, short summer range, and dry falls such as the one just past. Greater attention needs to be given to this shortage by many producers. Vitamin A deficiency results in night blindness, muscular incoordination, staggering gait, severe diarrhea in young calves, reduced ability next spring to become pregnant in cows, low fertility in bulls, and in pregnant animals may result in abortion or birth of dead, weak or blind calves. Vitamin A deficiency may cause more of our calving problems than previously realized.

Pregnant beef cows need four milligrams of carotene daily per 100 pounds of body weight. A 1200 pound beef cow requires about 48 milligrams of carotene daily. Carotene in mathematical terms is converted to Vitamin A by multiplying by 400 or 19,200 International units of Vitamin A. After calving the Vitamin A requirement doubles to about 40,000 I. U. of Vitamin A.

Rations which contain little green or yellow material or which have been badly weathered or stored long periods of time prior to feeding are low in carotene. Chaff and straw do not contain any Vitamin A. Grains and grain hay very little. Legume hays are the best natural source of Vitamin A. Generally good quality alfalfa hay will contain about thirty milligrams per pound. It is generally figured two pounds per head of good quality alfalfa will supply the Vitamin A needs for wintering cows. After calving this should be stepped up to 4 to 6 pounds if there still is no green pasture available.

1962 Grain Supports

The secretary of agriculture recently announced the 1962 wheat and feed grain national average support prices. They are wheat - \$2.00 (announced August 9 which is 21 cents above the 1962 effective rate); barley - 93 cents bushel; corn - \$1.93 per hundred-

IN THIS WORLD

IN LOOKING OVER OUR EVERGROWING HERITAGE... THE NORTHEASTERN STATES, THE CRADLE OF OUR COUNTRY, AND THE LUMBER INDUSTRY GREW UP TOGETHER. 531 YEARS AGO, IN 1631, THE FIRST COMMERCIAL SAWMILL WAS BUILT AT THE FOOT OF A WATERFALL IN SOUTH BERWICK, MAINE.

THE JOHN WHIFFLE HOUSE, BUILT IN 1640 AT IPSWICH, MASS., STANDS TODAY AS PROOF OF THE STABILITY OF BOTH THE BUILDERS AND THE WHITE PINE THEY USED FOR EXTERIORS OF THEIR HOMES.

WITH SOUND FOREST MANAGEMENT, MORE THAN A BILLION BOARD FEET OF WHITE PINE LUMBER IS NOW PRODUCED EACH YEAR IN THESE NORTHEASTERN STATES, (NEW YORK, PENNSYLVANIA AND NEW ENGLAND).

CONSERVATION AND SELECTIVE CUTTING ARE STANDARD PRACTICES OF LUMBER COMPANIES IN THESE STATES.

SOFT WOODS, SUCH AS WHITE PINE, ARE MOSTLY CONIFERS (EVERGREENS). HARD WOODS, SUCH AS MAPLE ARE DECIDUOUS TREES, (SHED THEIR LEAVES).

ONE GOOD REASON WHY THE NORTHEAST IS FAMOUS FOR PRODUCING EARLY AMERICAN FURNITURE IS THAT 23% OF U. S. HARDWOODS COMES FROM THE AREA.

The 1962 support prices reflect approximately 74 percent of January 1962 parity prices. Wheat support rate was raised to 85 percent of parity. Wheat is the only major price-support commodity which did not receive a raise in 1961.

Most people are able to talk freely to their physician about every aspect of their treatment—except one. The question, "How much is it going to cost?" and of how payment is to be made, often leaves the frankest patient tongue-tied.

Many refrain from bringing up the subject out of a sincere respect for their doctor, supposing it somehow unbecoming to talk to him about money. Many professional societies are now trying to clear up this misconception. For example, you may have noticed a significant plaque which hangs in thousands of physician's waiting rooms. It says:

"To all my patients—I invite you to discuss frankly with me any questions regarding my services or fees. The best medical service is based on a friendly mutual understanding between doctor and patient."

Sometimes, of course, your doctor cannot tell you, in advance, precisely what a course of treatment or an operation is going to cost. But you will always find him willing to discuss the subject, and to tell you if he can do more than ever before in medical history, the bill your doctor can represent one of the really big bargains of your life—in health, happiness and peace of mind.—Reprinted from a copy-righted advertisement published by Parke, Davis & Company, Detroit 32, Michigan.

Now Is The Time

Along about this time of year as the sun comes close enough to warm the air a little in the afternoons and shine on the interior walls the housewife gets to thinking about house cleaning.

Like a lot of other things the man of the house doesn't appreciate it until it is finished, then he brags about what a good housekeeper he married. But when he finds his favorite chair in a different corner and the house smelling like new paint he's inclined to object.

We know there's going to be housecleaning, probably in every house in the county. We couldn't start it and surely couldn't stop it. And we don't want to.

We can help it along with a stock of paint to suit the color scheme of the most imaginative housewife and Kemtone for any wall and wall paper samples from the little flowers grandma liked to the big, leafy kind the moderns go for.

TEN TO CHOOSE FROM

Also we've tools to get it all applied to the wall. You furnish the muscle and blossom with the spring.
