Fruits from the Northwest move to market dependably . . .

the **automated rail way**

A wide variety of Northwest fruits are picked, processed and packed at their flavorful best. Then they are rushed to refrigerator cars where constant temperatures are maintained while they are speeded to Eastern markets.

Electronically controlled equipment, communications and data processing, supervised by skilled employees, monitor each shipment. Giant turbine and diesel locomotives keep freight rolling dependably on Union Pacific—the automated rail way.

Low-cost RUST protection

Chevron Utility Coating makes it easy to rust proof equipment stored outdoors. This quick-drying asphaltic coating gives 6 to 12 months protection. Just spray or brush it on metal implements, orchard heaters, pipe, tanks or idle farm equipment.

Won't smear when used for branding sheep. It stays on top of wool, reducing loss when wool is sorted.
