County Ramblin's

SQUAW BUTTE FIELD DAY

The annual beef cattle field day at the Squaw Butte experiment station near Burns has been scheduled starting at 10:00 a.m. Monday, March 25. Programs are available at the county agents.

Last year J.J.Decker, Bob Tatum and Jay McKay attended and found it to be interesting and educational. Range operators over Sherman county will find the work done at Squaw Butte help ful in their operations.

Some of the program this year will cover crossbred and straight bred steers on fattening rations, controlled rations for mature cows, digestibility studies, performance testing, rations for weaner calves, wintering cow rations and other work going on oa the station.

WHEAT RESEARCH

Oregon Wheat league will meet with Oregon State Agricultural experiment station personnel on Tuesday, March 26 at Pendleton. Work of the agricultural experiment stations in wheat research will be reviewed with league officers and county production and land use committee members.

Review will include soil fertility, weed control, varietial improvement, new crops, tillage and cultural practices, soil conservation and various related research work in cereal diseases, livestock feeding and economics and government programs.

RESEAL PROGRAM

On March 7, the USDA announced a reseal program under which farmers may continue to get price support on farm stored grains after loan maturity dates. Ralph Busse, ASCS office manager reports the program will be available in Sherman county.

1964 WHEAT PROGRAM

Farmer county ASC committeemen, office managers and extension personnel met March 19 at Pendleton relative to the 1964 wheat program. The session dealt with program provisions and information on activity of the USDA.

Office managers and wheat clerks of the ASC will meet in Pendleton March 26 to review procedures for establishing allotments, yields and payment rates and conducting the referendum.

U.S.WHEAT ALLOTMENTS

"The USDA estimates there will be 1.6 million allotments concerned in the forthcoming wheat referendum. In the 1962 referendum, there were only 578 thousand allotments. The figures differ because this year the 15 acre grower is eligible to vote in the referendum which was not the case in 1962.

"For every allotment, there were 1½ eligible voters in 1962. The fractional voters being those of farmer's wife, tenants and operators who having an interest are eligible to vote."

"Speaking in terms of allotments, 1,175,000 are east of the Mississippi, 525,000 allotments are in southern states, Wisconsin, New Jersey and Minnesota. West of the Mississippi there are 476,000 allotments". Quoted from information from National Association of Wheat Growers report.

FAIR ACTIVITIES

The Sherman Fair board will meet Wednesday evening, March 27. Superintendents and interested persons will offer changes in the premium book and suggested fair improvements then.

The 1963 county fair has been set for September 12—15. Prefair 4-H horse judging has been set for June 26. Exhibits in 4-H home economics will be judged the fore part of July with the exact date to be set soon.

NORTH PACIFIC GRAIN

Local co-ops are members of the regional grain marketing and warehousing cooperative --North Pacific Grain Growers--which has 53 locals. Over the northwest, these locals own 103,071,000 bushels of off-farm grain storage facilities, have a net worth of $41,893,000 and are owned by 23,740 members. In addition NPGG alone controls terminal elevators at Kalama, Vancouver, Spokane and Kennewick with a capacity of 11,375,000 bushels and a net worth of $4,577,150.

According to government statistics there is a total of 264,510,000 bushels of grain storage in the area served by NPGG.

WHEAT BARGE SHIPMENT

Pendleton Grain Growers Umatilla elevator loaded a barge with 70,625 bushels of wheat in February. This is a new record, but on completion of the John Day dam, allowing ocean going barges, larger barge loads up to 100,000 bushels can be expected. Not too many years ago 20,000 bushels was considered a whopper.

RESTRICTIVE USE OF 2,4D

The Oregon house of representatives held hearings on bills dealing with 2,4-D use last week. Proposed legislation will outlaw the use of isopropylester of 2,4-D in the entire state. The legislation included an emergency clause so it will be in effect when signed by the governor. Therefore restriction will take place immediately upon passage which is expected by April 1.

Suppliers and growers will need to deplete stocks of this particular 2,4-D. Research in the Milton-Freewater area has shown existence of this type 2,4-D particles in the area even though it was not used within a 30 mile distance.

Several other types of 2,4-D are available which will handle our weed problem and not create a hazard to other crops. Butyl, now commonly used by plane operators, is cheapest and probably more effective, amines and low volatile esters are still available for general use.

Karen Shoemaker, who was a Klamath Falls resident when she was designated as 1961 Easter Seal child, is now a student at Children's H ospital School in Eugene, where muscles as well as minds are educated. Karen admires planting of spring flowers at school, which is supported by annual sale of Easter Seals by Oregon Society for Crippled Children and Adults.
