

The Observer.

OFFICIAL PAPER OF SHERMAN CO.
MORO, OREGON.

D. C. IRELAND & SONS, PUBLISHERS

THURSDAY, NOVEMBER 29, 1906

Oregon cast about 95,000 votes this month. An increase of 43,000 in 12 years.

Oregon must have a registration law. The present constitution imposes no obstacle.

History repeats itself because there is no telephone girl around to make it ring off.

And now comes a prolonged season of cabinet making by people who don't make cabinets.

Mr. Sewall is glad that the ship of state was not his only possible resource in the navigation line.

It seems like old times to meet once more the dear familiar face of the Cuban Question at very close quarters.

The new administration it is said will be fin de siècle enough to go in for those fashionable special sessions of congress.

Mr. Corliss promises international bimetalism in two years. He makes the prediction without the consent of the other nations.

According to scriptural authority the meek have a good chance of seeing heaven but in this world they are always being stepped on.

It is difficult to understand how the country was simultaneously saved by so many individuals without serious interference with each other.

Maj. McKinley is confronted with another pressing national question—the assault of 16 office seekers to one job.

Football men wear long hair to show the world that there are other kinds of intellectual men besides poets.

Under the resistless rush of the office seekers feet Maj. McKinley's lawn will now become a hole in the ground.

Spain having procured a further loan of \$85,000,000 there is naturally some curiosity to know what else she had to pawn.

The trouble with the proposition to make Tom Reed secretary of state is that he seems to be slated for the speakers chair.

It seems that David B. Hill must have made a bet never to speak again until Bryan should be elected president.

The freak election better is around again to substantiate the gloomy predictions of the alienists of the universe.

Gov. Stone of Missouri has already organized himself into a campaign committee to elect the candidates of 1909.

One of the unpleasant things about the kleptomaniacs is that somehow the complaint seems to be too aristocratic to be caught very often by any body but the rich.

There was no real reason why the Hon. Tom Watson's letter of acceptance should not be given to the expectant American people even though the election had passed.

It may be the world is near the day for the breaking of the telephone monopoly but the public will not begin to cheer until the broken pieces of the monopoly are brought into court.

One certain cause which kept the price of wheat down was the silver agitation. European dealers allowed their stocks to run low expecting to pay for fresh supplies in depreciated money.

An Iowa man bet \$10 that he could ride the fly wheel of a saw mill. When his widow paid the bet she remarked sympathetically that he didn't know much about saw mill fly wheels.

The terrible Russian thistle appears can be made useful. Only last session congress was asked to appropriate \$1,500,000 for the suppression of the Russian thistle in the northwest. Now a South Dakota mail owner has offered \$150 a ton for all the thistle which may be delivered at his factory. He says it is nearly as good as coal for fuel.

The business of the country will receive profound satisfaction from the assurance of Mr. Hanna that the republican party is to be maintained through the interval to the next presidential election to push the fight for sound money to a completely successful issue. The silver question is not practically but that is only one of the many questions.

Grass Valley News.

Travelers will find the Vinton hotel a good place to stop. The dining touches are just being put on.

Many of our people are thinking it is time their word was hauled.

Election is over and everyone happy. Even the Bryan men who believe in government by the people are content to abide the decision.

Sunday evening the W. C. T. U. held a meeting in the church. Mrs. E. E. Clark in the chair. Mr. Rea Marquis, Mrs. Carl and Mrs. Brown held forth telling temperance pieces. Recitations by Carl Carl, Sallie Vinton and Verna Witham were nicely given. The songs by Sallie Vinton and Anna Hargreaves and the pieces rendered by a number of children taught by Mrs. Hargreaves, were very sweet. Miss Estella Vinton played for them. A very pleasant program was concluded by an address from the pastor. A collection was taken for home missions amounting to \$10.00.

Twenty-five pupils are now attending the academy. Quite a number will commence with the winter term. To any one desiring to become teachers or desiring to advance in the profession, here is an opportunity. One cannot afford to stay out of the advanced class. Part of the term is taken up working questions from the Oregon and New York teachers examination papers.

There is Nothing so Good.

There is nothing so good as Dr. King's New Discovery for Consumption, Coughs and Colds, so demand it and do not permit the dealer to sell you some substitute. He will not claim there is anything better, but in order to make more profit he may claim something else to be just as good. You want Dr. King's New Discovery because you know it to be safe and reliable and guaranteed to do good or money refunded. For coughs, colds, consumption and affections of throat, chest, and lungs, there is nothing so good as Dr. King's New Discovery. A trial bottle free at Bolton & Co's. Regular size 50c and \$1.00.

Bolivia, in a stormy session of its chamber of deputies, has stirred Spain tremendously by recognizing the Cuban insurgents as belligerents. Now for will fly.

ON DIVERS TOPICS.

OAK taken from the old Dutch church in Nassau street is used for the woodwork of the library in the house of Mrs. S. B. Duryea, of Brooklyn.

TWO HUNDRED years ago the west coast Africans had "money of account," the standard being a bar of iron, and anything supposed to equal its value was called a "bar."

In Hillsborough county, N. H., there is a solid rock with a channel seventy feet deep and thirty feet wide cut through its side. A flight of rude natural steps leads to the top, where there is a natural pulpit and pool for baptism.

The Finger Prayer Book, issued by the University of Oxford, is the smallest prayer book in the world. It weighs three-quarters of an ounce, and measures one inch in length by three-quarters of an inch in width. It contains six hundred and seventy pages.

In the Massachusetts general assembly made bullets a legal tender by the following enactment: "It is likewise ordered that musket bullets of a full bore shall pass currently for a farthing, and that no man be compelled to take above XII d at a time in them."

A "COMBINATION VERDICT," which included a variety of bills, was rendered by the jury in the case of a man recently described in your paper and it is certainly a wonder. I can assure in less than one minute, and the latter is a man and you get considerably more better than when you see a common claim. I took the money for the chair here and away. I know I have given the best of evidence, I know I have given the best of evidence, I know I have given the best of evidence.

FRANCE is the only European country which has today fewer able-bodied men than it had thirty years ago.

WOODEN shoes are worn by about twenty million people in Europe. Most of them are made of basswood.

THERE was a net decrease in the British revenue receipts during the first quarter of the present financial year of 1906 as compared with the same period last year.

THE Prussian government is making an experiment in boring in the Rybnik district of Prussian Silesia, which, at the depth of a mile and a quarter, is still progressing.

MAPS for the use of farmers, describing the chemical qualities of the land in various parts of the country, and naming the best manures for each section, have been proposed in France.

OUT of seventy-six Irish kings who ruled between A. D. 4 and 1172, no fewer than fifty-two died violent deaths either in battle, by murder, or by treachery (by the latter three were slain).

It is said that on an average every champagne cork is utilized for three separate bottles before it gets broken or thrown aside as useless. English vintners get about two shillings a pair for them from the manufacturers and one shilling a pair for soda water corks.

SOMEthing about MAN. OCEANISTS estimate that one person in four has defective vision.

RAPID growth of the finger nails is considered to indicate good health.

A LOON, strong thumb always indicates great will power and force of character.

DR. JUAN SANTOS FERNANDEZ said at the world's fair medical congress that he had investigated and could find no disease of the eye peculiar to the islands of Cuba.

THE hand with spatulated and knobby fingers belongs to the practical and mechanical scientist. Vanhan, Arago, Herschel and Stevenson had such hands.

A SCIENTIST who has investigated the matter states that the men who are employed in the Paris sewers are as healthy as the men who are in any other free hundred men in that city are so free from zymotic diseases.

THE ONLY True Blood Purifier is prominently in the public eye today is Hood's Sarsaparilla. Therefore get Hood's and ONLY HOOD'S.

Letter from the Major.

WASCO—With the abundance of rain, which the weather settles our farmers will be well prepared for seeding.

Rev. Mewer, pastor of the U. B. Church, has arrived and will occupy the Denning house.

The editor of The News has been on the sick list ever since the election.

Commis-sioner Orr talks of taking a trip to Ohio to visit his mother.

Miss Sarah Armstrong has been quite ill for the past few days.

Clark Dunlap and son visited The Dalles last week.

W. M. Burnett and V. C. Brock attended court in The Dalles last week.

The teachers examination which convened here last week only had three teachers apply for certificates. Some of the school children tried just to see what their grades would be.

The Ladies' Aid Society will give a turkey dinner Thanksgiving, the proceeds to go to the indigent needy of the M. E. Church. The price fixed is 20c. for adults and 10c. for children under 10 years of age.

E. L. Weld has returned to Wasco and is able to attend to business after a hard spell of sickness.

I would like if some one would please inform me what interest M.A. Hicks has in the postoffice. Mayor.

Coins of Brass and Tin. When England was being made into a mine and blocks of real estate by the Saxons and Danes, silver and brass were in use as currency. The Saxons subsequently installed the art to create metal and left the democratic brass to take care of itself. Gold was first coined by Henry III, and copper made into British coin in 1772. This was used for coinage in 1680, and the national farthing was made of this Cambrian product with a steel of copper leaf in the center. In 1801 and 1802 half-pence were issued in considerable quantities. The only pure gold coins issued in English history were those of Henry III.

Old Religions in Russia. Russia has of late harbored more eccentric and mysterious religious sects than any other country's. One of these has for some months past created great perturbation in the province of Vozna. This new creed, the members of which are called "sheerens," or "sheerens," is extremely fanatical. The inhabitants of all the villages in the province above mentioned discover in the morning, one after the other, that their flocks have been plucked of their feathers, their sheep shorn of their wool and the homes of their mains and tails, and that the feathers, wool and hair thus obtained have been burned as a sacrifice to some unknown deity. The peasants are terrified at the depredations of the "sheerens," who are, they believe, inspired by an evil spirit, and complaints are being sent by them to the authorities. The depredations, however, are so careful to avoid detection that up to this day it has been impossible to catch any of them in the act.

Marriages in St. Petersburg. The statistics for the year 1905 show that in that year 6,200 marriages were contracted in St. Petersburg. Men between the ages of 26 and 30 years marrying women of 21-25 formed the largest proportion of the above number. In proportion came men of 21-25 marrying women of 21-25 in proportion were men over 30 years marrying women of the ages 21-25 years. Most of the marriages took place in the month of January. May was the next month proportion of marriage; in June the least number of marriages were contracted.

Churning Done in One Minute. I have tried the Lightning Churn recently described in your paper and it is certainly a wonder. I can assure in less than one minute, and the latter is a man and you get considerably more better than when you see a common claim. I took the money for the chair here and away. I know I have given the best of evidence, I know I have given the best of evidence, I know I have given the best of evidence.

FROM OVER THE OCEAN. FRANCE is the only European country which has today fewer able-bodied men than it had thirty years ago.

WOODEN shoes are worn by about twenty million people in Europe. Most of them are made of basswood.

THERE was a net decrease in the British revenue receipts during the first quarter of the present financial year of 1906 as compared with the same period last year.

THE Prussian government is making an experiment in boring in the Rybnik district of Prussian Silesia, which, at the depth of a mile and a quarter, is still progressing.

MAPS for the use of farmers, describing the chemical qualities of the land in various parts of the country, and naming the best manures for each section, have been proposed in France.

OUT of seventy-six Irish kings who ruled between A. D. 4 and 1172, no fewer than fifty-two died violent deaths either in battle, by murder, or by treachery (by the latter three were slain).

It is said that on an average every champagne cork is utilized for three separate bottles before it gets broken or thrown aside as useless. English vintners get about two shillings a pair for them from the manufacturers and one shilling a pair for soda water corks.

SOMEthing about MAN. OCEANISTS estimate that one person in four has defective vision.

RAPID growth of the finger nails is considered to indicate good health.

A LOON, strong thumb always indicates great will power and force of character.

DR. JUAN SANTOS FERNANDEZ said at the world's fair medical congress that he had investigated and could find no disease of the eye peculiar to the islands of Cuba.

THE hand with spatulated and knobby fingers belongs to the practical and mechanical scientist. Vanhan, Arago, Herschel and Stevenson had such hands.

A SCIENTIST who has investigated the matter states that the men who are employed in the Paris sewers are as healthy as the men who are in any other free hundred men in that city are so free from zymotic diseases.

THE ONLY True Blood Purifier is prominently in the public eye today is Hood's Sarsaparilla. Therefore get Hood's and ONLY HOOD'S.

THE OBSERVER has a fine stock of blank paper now and is prepared to do the finest, neatest and most artistic job work. We have the material to do with material that no other office has. Call and see.

There is not a business within the range of Sherman county that is so well known as the business of the OBSERVER. We have the material to do with material that no other office has. Call and see.

Gray Hair Made Dark.

I saw in your paper a statement that Zulu Vetter would restore any head of hair to natural color in three weeks. As I was very gray I sent for a sample package, and in less than three weeks my hair was perfectly restored to natural color. My wife's hair was a light red, and by using Zulu Vetter her hair is now a beautiful auburn. Anyone can get a sample package of Zulu Vetter by sending 21 cents to the publisher, The Yellow Hair Cure, 1015 Broadway, New York, N. Y.

Anyone can get a sample package of Zulu Vetter by sending 21 cents to the publisher, The Yellow Hair Cure, 1015 Broadway, New York, N. Y.

Gray Hair Made Dark.

I saw in your paper a statement that Zulu Vetter would restore any head of hair to natural color in three weeks. As I was very gray I sent for a sample package, and in less than three weeks my hair was perfectly restored to natural color.
