There are people who have objection to advertising matter in the reading columns of a newspaper. The ground of objection is that they don't want to read advertisements.

Now this objection is not good, for often times advertisements convey valuable information. For instance how else would the farming public learn of the excellence of the improved machinery sold in Moro by Moore Bros. and R. J. Ginn?

A drove of 100 horses in Gilliam county will be killed and burned to prevent the mangle, with which they are afflicted, from spreading. This band of neglected brutes belongs to a "humanitarian" in Portland who don't believe a sheep owner should be allowed to graze his flocks on the public domain.

Judicious advertising pays. Competition is the life of advertising.

Judgment in advertising is just as essential as judgment in buying goods.

It will pay any man to advertise who deals in something that people want.

No article was ever made that was so good that it was its own best advertisement.

Those who have made advertising most profitable are the ones who keep at it all the time.

One clear, convincing and speaking fact will effect more than pages of glittering generalities.

Your advertising, as well as every corner and cranny of your business and social life should be illuminated by the clear, white light of truth. Nothing stands in the long run like rock-ribbed truth.

Every one who is interested in advertising knows that there are hundreds of articles on sale over the country that would never have been known to the general public had it not been for advertising them.

That advertising does pay and pay big when given constant business, brainy attention, is proven by the colossal fortunes made, and being made in trade, with advertising recognized as an important and essential factor.

With sheep and cattle on the rise, a growing demand for horses, and the prospect of a good price for wheat, the Globe feels that it is not unduly optimistic in predicting for Gilliam county the most prosperous year she has had during half a decade.

Not over ten per cent of the Wallamet valley grain land has been sown. The amount plowed for sowing is also very small. As a rule horses are in a poor condition for work and many of the farmers have no feed which is certainly inexcusable.

Electric Bitters. Electric Bitters is a medicine suited for any season, but perhaps more generally needed when the languid exhausted feeling prevails, when the liver is torpid and sluggish and the need of a tonic and alterative is felt. A prompt use of this medicine has often averted long and perhaps fatal bilious fevers. No medicine will act, more surely in counteracting and freeing the system from the material poison. Headache, indigestion, constipation, dizziness yield to Electric Bitters. 50 cents and \$1.00 per bottle at A. D. Bolton & Co's drug store.

An Hour With The Doctor. Never keep food in the sick-room, and cover up water when it is necessary to keep it in the room for ever so short a time. A nurse should never eat in the sick-room.

One of the small things to remember is that alcohol will quickly remove an obstinate porous plaster whose period of usefulness has expired, and will also cause all unsightly traces of its use to disappear.

In a case of fainting, place the patient on a level surface, with the head not elevated; give free access to fresh air, loosen clothing, sprinkle the face with cold water, and, with utmost care, apply smelling salts or ammonia to the nostrils. Carelessness in the use of ammonia may cause serious injury.

Who would suppose that a turned down kerosene lamp would breed diphtheria? We are all accustomed to the disagreeable fumes arising from this cause; and when New York was suffering from an epidemic of diphtheria, the Board of Health decided that its presence was to be attributed to the fumes of a kerosene lamp turned down low more than to any other single cause.

When children are suffering from convulsions caused by constipation, indigestion or teething, give a hot bath with a table-spoonful of mustard in the water, or roll the child in a blanket wrung out of hot water not so hot as to scald the tender skin. Apply cold water to the head and administer every fifteen minutes a teaspoonful of syrup of ipecac; continue this until vomiting is produced.

Don't be afraid to get out of doors because it is a little colder than usual. The cold air will not hurt you if you are properly protected and take exercise enough to keep the circulation active. On the contrary, it will do you good. Cold air, if pure, will not hurt you at night any more than in the day, if you are protected by sufficient clothing, and by breathing through the nostrils. If you do not breathe thus, acquire the habit as soon as possible.

If you wish to be subject to colds, coughs and fevers, shut yourself in close, hot rooms day and night. If you wish to be free from their companionship, always have plenty of pure air to breathe, night and day take daily outdoor exercise, regardless of the weather, except as to clothing protection.
