The Amen! of marriage is always a baby. Without it, wedlock is a summer field that never blooms, a flower that never buds, a night without stars, a sermon without a benediction, a prayer without an Amen.

There never was a husband worthy of the name, who did not aspire to be the father and the grandfather of healthy, capable children to hand down his name and the fortune accumulated by the sweat of his brow, from generation to generation. There never was a wife fit to bear that noble title, who did not wish to wear womanhood's most glorious crown, the sceptre of motherhood. Thousands of wedded couples, otherwise happy, fall short of wedlock's greatest happiness because they are childless. In the majority of cases, this is because the wife, through ignorance or neglect, suffers from weakness and disease of the organs distinctly feminine. For women who suffer in this way there is one great medicine that does not fail to accomplish its purpose. It is Dr. Pierce's Favorite Prescription. It acts directly on the delicate organs concerned and makes them strong, healthy, vigorous, virile and elastic. It allays inflammation, heals ulceration, soothes pain and tones the shattered nerves. It fits for wifehood and motherhood. It quickens and vitalizes the distinctly feminine organism. It banishes the maladies of the expectant months and makes baby's introduction to the world easy and almost painless. It insures the little new-comer's health and nourishment in plenty. It is the best supportive tonic for nursing mothers.

Mrs. Jennie Parks, of Marshall, Spokane Co., Wash., writes: "I am glad to tell of the good results of your great medicine.—Dr. Pierce's Favorite Prescription. I was benefited by your medicine in confinement. It gives me strength. I have no tired feeling and my baby is the picture of health. I feel better than I have in ten years."

In cases of constipation Dr. Pierce's Pleasant Pellets should be used as an adjunct to the "Favorite Prescription," they are extremely simple, perfectly natural and insure prompt and permanent relief.

Now that Bossy Cow has no opportunity to bring curses upon her in Moro, shrubbery is safe from depradation and the green grass grows all round, which in part will relieve the city from its dirty appearance. But there are still some nuisances in town to abate.

J.C.Williams has sold the baths and barber shop in Mrs. Maxwell's building to Jesse Landry. Jess is one of Moro's favorite young men, just starting out in business, and is bound to do well. Mr. Williams will be greatly missed from Moro business circles, but everybody joins in wishing him well in his future plans.

Some of our citizens seem to have little respect for law. They seem to think it is all right to violate law if there is anything to be made of it. This same spirit leads to robbery and anarchy.

To see the amount of farm machinery sold here one would think that heretofore crops had been harvested and cared for in the primitive manner. We fear it will take most of the crop this year to pay for that sold by the O.T.Co. and times will continue as hard as ever.

When at the Dalles on a recent visit a sneak thief invaded the hotel where Mr. and Mrs. E. H. Moore were stopping and took Mrs. M's watch from under her pillow. The thief escaped but the watch was found in a Portland pawn shop

J. M. Parry's last letter from Alaska informs him that Harry has left off navigating the Yukon and is now delving into the bowels of Mother Earth in search of treasures known to be there. We hope Harry may fetch out a packhorse load of gold dust next year.

At the school examination at Fairview last week one of the Young Idea's compositions on great men brought the house down on Teacher Jack Kern's head, when the little fellow had talked about George Washington, Grover Cleveland, Oscar Hulse, then held out at arms length a nutmeg grater as the greater.

J.M.Filloon took a snap shot on the 4th at Misses Wright and Nora McCoy as the young ladies were resting in Moro Park. No where else does the park show so handsome as in this picture. Through the dense foliage one can get a glimpse of Mr. Filloon's residence making a scene almost as fascinating as one of Gifford's Oneonta Gorge views.

Last week John W. Golden got his family together in this city all ready to set up housekeeping. There were: Geo. Grubbe, Rod Cameron, Bert Magers, Alex Gravel, Hiram Donnelly all blissful in anticipation of the blessings of a Home with the capital H, when along came a wool producer who ruthlessly grappled onto John and tearing him from the bosom of his family took him afar away into the mountain fastnesses where scarcely a ray of sunshine will greet him to remind him of the orphans left in semi-arid Moro to mourn his departure and forage on Doug Radley.

Arlington Advocate: Hon. J. E. David, wife and sister-in-law Mrs. Leighton, of Maryland, came in from Croy yesterday. Mrs.Leighton has been visiting with Mr.David's family for the last two months, and will make a short visit in Idaho when she will go home. Mr.David informs us that Croy now gets mail from Blalock instead of Moro as formerly and does not have to cross the John Day river which proved impassable part of the time, causing much inconvenience and delay. Local parties bid on the new route, but as usual the shark contractors of the east under bid them and when the time came failed to appear consequently the postmaster made arrangements to have it carried for the present.

Corvallis Times: The experiment station is working on the problem of what crop to substitute for summer fallow on Eastern Oregon farms. For the Willamette valley this question has been determined, and corn, vetches and a dozen other substitutes for summer fallow have been laid down; but on account of the dryer climate and lack of soil moisture in Eastern Oregon, the question for that section is still unsolved. By way of experiment the station has secured a tract near Moro, at the farm of Horace Strong which is being operated under direction of Dr. Withycombe. This farm has two fields in summer fallow; one of coarser and the other of finer reduction of soil particles, and a third field is in peas. The effects will be tested from time to time during the season, and the moisture of the soil under the three treatments be measured. The peas so far have only attained a height of eight inches, and Dr. Withycombe is of opinion that they will not be effective for the desired purpose.
