

The Observer.

MORO, OREGON: FRIDAY, SEPT. 21, 1906

Personal Talk With You.

If you do not read The Observer Why Not?

We should like to have you take it, and we know it would be profitable to you to become a subscriber.

At any time when requested to do so, the paper will be discontinued. But we expect that all arrears will be paid before such request is made.

INCUBATOR CHICKS.

There seem to be wide and varied opinions as to why chicks die in the shell.

Many claim, which is true in a sense, that the germ is weak, caused by too close inbreeding. It is true also that we find weak germs at times when the parent stock is not related, writes O. F. Scott in Western Poultry Journal.

The system of ventilation in incubators of today is such as to cause a draft, drying the eggs too fast, causing the membrane or lining beneath the shell of the egg to become tough, so much so that at hatching time the chick is unable to break through, many even dying in the shell after being piped.

By placing a hygrometer under a station when the humidity or moisture will register about 60 per cent, while in almost all makes of incubators less than half that amount will be shown.

Another useful-in fact, almost indispensable-article around a poultry yard is a carrying box or crate, says Reliable Poultry Journal. It is necessary, especially where one is somewhat cramped for room, to be continually changing young stock from one yard or house to another, separating pullets from cockerels or doubling up yards in order to make room for others.

Another useful-in fact, almost indispensable-article around a poultry yard is a carrying box or crate, says Reliable Poultry Journal. It is necessary, especially where one is somewhat cramped for room, to be continually changing young stock from one yard or house to another, separating pullets from cockerels or doubling up yards in order to make room for others.

ROBBED BY A BOY BURGLAR

Mr. Fogarty Said, "Quit Yer Kiddin'," but Found It Was No Joke.

Juvenile Dick Turpin, abound in Philadelphia, according to John J. Fogarty, says a Quaker City correspondent of the St. Louis Republic. Mr. Fogarty is mourning the loss of his bank roll, a gold watch and two revolvers.

Fogarty declares that he would not mind the incident which left him on the verge of bankruptcy were it not for the fact that the youngster hold him up at the point of a gun and actually and actually laughed and joked with him while snatching the bank roll.

Fogarty is an old time prize fighter and, as in the days of his youth, sticks to the time honored ring drink of tea.

The tea was all out in the Fogarty household, and Mrs. Fogarty started for a grocery store to replenish the supply. Mr. Fogarty was sleeping in the room.

"I've faced Jack Dempsey when he was in his prime," says Mr. Fogarty. "but Jack never caused the rummy chick feeling to creep down my spine that the revolver did. My sympathies go to a man who is looking in the face of a gun."

Fogarty declares the holdup artist was not over fourteen years old and wore knee trousers.

"Hold still, Mr. Fogarty," said the youngster. "I've some business with you."

He held the revolver in his left hand, the young man. "You'd better go to sleep again."

"Put that money back," yelled Fogarty as he saw his \$114 go on a long shot.

"Aw, gwan," jestingly answered the boy. "I need this for Christmas. Mama's gotta have a new sealakin sack, and me otermobille is out of repairs."

The money safely pocketed—in the boy's pocket, of course—the youngster tucked Mr. Fogarty's vest. It gave up a beautiful gold watch valued at \$75.

"Keep still, Mr. Fogarty. Don't get excited," cautioned the boy. "I'm not a kid."

"Does this look like a joke?" asked the young man. "You'd better go to sleep again."

"Put that money back," yelled Fogarty as he saw his \$114 go on a long shot.

"Aw, gwan," jestingly answered the boy. "I need this for Christmas. Mama's gotta have a new sealakin sack, and me otermobille is out of repairs."

How Nature Provides.

Our Beauty, Health and Happiness.

It is not possible, and altogether probable that elements necessary for the body health are contained in the medicinal roots found in the earth, digested in the plant laboratory of Nature and made ready for man or animal.

There is a growing belief among scientists that the vegetable kingdom furnishes us with the necessary elements for blood making—that delicate balance of health that the human animal is so apt to disturb by wrong methods of living.

M. M. S. POULTRY FENCING.

HAS POINTS OF MERIT WORTHY OF ATTENTION.

The best features of merit in this fencing are found in its multitude of horizontal wires, the cabled selvage and cable every foot in the height of fence, to say nothing of the connecting mesh wires; this, coupled with its peculiar construction, bars any possibility of its contracting, sagging or narrowing together between posts; doing away with the top and bottom board rail and fully one-half the number of posts ordinarily required, which reduces the actual cost of the completed fence. These items alone insure a saving of fully 50 per cent. to the user, without taking into account the fact that a fence with a top rail must be much higher than one without to be of equal service, for a top rail, being visible, marks the height of the fence and gives chickens something to light on. It is made of the best galvanized steel wire, smoothly and evenly woven, and retains its full height before as well as after stretching.

Manufactured by the Pacific Steel and Wire Co., Oakland, Cal. Portland, Oregon. Carmody Bros., Selling Agents, Floro, Oregon.

Meats and Vegetables Eatables of all kinds at The Sachs Market J. H. SACHS McCaleb Building Main Street.
