After 60 years imprisonment in the everlasting ice fields of the Arctic, McClure's famous exploring ship investigator, a typical example of the old-time "wooden walls of England," has been set free by the retreating frost king, and may be brot around Alaska and to Equimait. McClure, now 50 years dead, was one of the early searchers for the north pole. He had to abandon his ship in 1847 because of the scourge of scurvy attacking his crew. Instruments and supplies were left on board, and a considerable quantity is still in good condition, because of the natural cold storage of the far northern zone. Until the past year no one has been on board. It is believed that the Investigator was the vessel sighted upon the bleak and barren Arctic coast six years ago by intrepid natives, whose fancies, stimulated by their religious teachings, led them to report the finding of Noah's Ark. Several wintering steam whalers are keeping as close as possible to the old ship and hope if luck and weather favors, to be able to tow her back with them.

Very Respectfully yours, A. M. CRAWFORD, Attorney General
