Sherman county was surprised at receiving the announcement in the Sunday Oregonian that Hon E V Littlefield had tendered his resignation as circuit judge of the 11th judicial district, and that Gov Chamberlain had appointed Hon R R Butler of Cocon, to succeed him.

Nothing but his business interests in Portland and the valley could have taken Judge Littlefield away from us, and much as the people may regret his determination to go, only the best wishes of the entire community accompany him. We have known Ed from a little boy, and have pride in remembrance of our forecast made concerning his future more than 25 years ago. We regret his departure, but feel very kind to Gov Chamberlain for the appointment he has made to succeed Mr Littlefield. Mr Butler is a young but rising attorney, and within the brief space of two years' time has been before the public so frequently as to become very well known, and popular. He is the law partner of Senator Jay Bowerman, president of the state senate, and was one of the presidential electors chosen at the election last November, on the republican ticket, and was sent to Washington city to carry the vote of Oregon to the U S Senate. Mr Butler is just returning from a visit to his parents at Butler, Tenn., and we copy from the home paper as follows: "Mr Butler has been forging to the front rapidly in his profession, and those who know him best feel assured that ere long he will be marching at the head of the legal column along the Pacific slope. Aside from being established in the law, Mr Butler has won an enviable reputation in politics, having been one of the republican electors of Oregon in the last presidential campaign. In this contest he acquitted himself well, and came out with flying colors. His campaign of the state was a brilliant one and was highly complimented by the press. He was honored with the position of messenger, having reached Washington city with the vote early last week though a day late on account of bad railway connections en route

The next great earthquake is to take place on the Pacific coast, in Washington and Oregon;" is the startling prophecy that science now hurles at these two great states; a warning to the people to prepare for such shocks as have visited California, Chile and Sicily in the last few years. The prophecy, with all its possibilities, is not the wild ranting of some irresponsible impostor, but the sober judgment of savants who have devoted their lives to the study of seismic disturbances, asserts Prof Lawson, of Chicago, one of the foremost living authorities on earthquakes. He having the distinction of having accurately foretold the Guerrero quake in Mexico, and he is supported in his recent prediction by men whose names are equally famous in the world of science.
