Walnut Profitable as a Shade Tree. If every tree now located on the state house grounds at Salem, was a walnut tree the taxpayers of Oregon could save \$3,200 annually according to figures compiled by capitol officials. This amount is an excellent approximate figuring on the basis of 166 per lb. for walnuts. At present there are 200 trees of mature age standing on the state house grounds; these trees, at their present age, would bear at least 200 pounds of walnuts each if they were that class of trees. This would be a fine thing for the Sherman county court house park, Moro city park and private grounds, planted to shade in locust trees, as the walnut does not breed pests.

A Cooking Hint. When cooking old potatoes that look dark, pour off the water and mash them fine; then add the butter, cream and salt; then take them to the open air, in the kettle, and beat them while the air is blowing on them, and they will get white and fluffy. Try it, and be convinced.
