For County news

Low Fares to the Northwest.

Special inducements to home-seekers in the way of rates will be given from March 15th to April 15th, 1913, when a very low charge will be made over the O. W. R. & N. Co., lines and connecting lines from the east and south.

Colonist travel now does not mean crowding and discomforts. For the journey sleepers are attached to all trains and slight increase over the regular fare will provide every comfort en route. The colonist sleeper differs from the standard Pullman sleeper only in upholstery fittings. The mattresses and covers are of a standard quality.

One of the advantages of the rates during the Colonist season is that fares may be prepaid. Any one may arrange for coming of relatives and friends. When the money is deposited the agent attends to all the details of wiring for tickets, sleeping car reservations, etc.

Regular stops are made for meals for the benefit of the travelers who do not carry provisions with them on the trip.

The Colonist rates offer an easy solution of the problem confronting the homeseeker as to how to reach the Northwest, while the prepaid feature has rendered it possible for many to come who would otherwise not make the journey.

Stopovers allowed on Colonist tickets at all points on O. W. R. & N. This gives the homeseeker thirty days from the date purchase of ticket to look over the country, the only requirement being that ticket be used to destination within time limit. When stopping at any intermediate point, the ticket must be deposited with the agent of the company.

Rates from any point in the United States promptly furnished on application to any agent of the O. W. R. & N.

Boys as inventors.

Marconi was a mere lad when he made his epoch making discovery of wireless telegraphy. He was, indeed, little more than a boy when he actually brought the almost perfected instrument to the notice of the world.

Another notable invention of a boy is the hydraulic steam crane, which stands to the credit of Lord Armstrong, the founder of the wonderful engineering works and great ship yards at Newcastle.

A 16-year-old boy answering to the rather common name of John Brown was the inventor of the sliding railway buffer, which has made such a difference to the wear and tear of rolling stock, and, for that matter, to the nervous systems of millions of passengers.

Farmers Attention.

YOU WILL NEVER KNOW of the most effective way of treating your seed against the destructive underground worms, insects, smut and other destructive growths, unless YOU USE WORMALDEHYDE, prepared for treating seed grain, spraying trees and shrubs, chicken houses and other farm buildings. WORMALDEHYDE is the most practical and efficient preparation on the market. 50% of the preparation is Formaldehyde, which is for the prevention of smut. The other 50% is made up of a number of substances antagonistic to the species of underground worms so destructive to grain. Full directions on each bottle. If your dealer cannot supply you, write or call on us, WORMALDEHYDE Company Inc., Moro, Oregon.

The illumination of the San Francisco Exposition will form a remarkable attraction. The one in charge of the lighting has perfected a scheme enabling him to produce light effects undreamed of at any of the former world exhibitions. There will not be a single article of lighting equipment that has ever used before. \$50,000 has been expended in experiment in the development of cut glass reflectors, to be known as jewels for use at the exposition. The results to be produced from their reflected light will be of a startling and scientifically wonderful nature.

Don't become so interested in a great work that you neglect to do the chores around home.

Guy L. Anderson, confidential clerk and assistant to Traffic Manager R. B. Miller of the O. W. R. & N. Co., has been appointed general manager of the Sumpter Valley Railway, running out of Baker towards Burns. Mr. Anderson is only 25 years old; he entered the railway service as messenger boy ten years ago; he is now in entire charge of a \$2,000,000 property. He did not get this appointment as a matter of "luck" but by application, study, and hard work. Any other young man can do the same in his chosen work by the same methods. There is plenty of room at the top for any man who will fit himself for his opportunity which is to come.

The Grain Growers Convenience

Are not alone confined to Rural Free Delivery of mail and the Telephone. There is another convenience which all farmers should have — and many do have — a checking account with a good bank. The possessor of such an account avoids the risk of having his money on his person or about his home where it is in danger of fire and thieves.

His bills paid by check are not only a valid receipt, but also a convenience in his home transactions where very often the necessary change for concluding settlement is not at hand. Don't stop to think this over, but start an account now with
