What the Tum-A-Lum Method Means to You.

You've often wished you had a friend or a relative in the lumber business to help you and give you counsel when you get ready to build. You have spent a good deal of time going through magazines and farm papers looking for suggestions to help you solve the problem of getting just the right building for your needs at the right price.

It is easy to get this very building when you build by the Tum-A-Lum Method.

Our Service Department cuts out all waste with its Material Saving Lists. Your lumber is all used in the building.

We own no mills and are therefore not a "dumping place" for any undesirable surplus. We buy from the best markets of the world. Their output comes to our yard without one cent of added selling cost — you pay the one right price for your lumber.

The result is that you get the best possible building for the lowest cost.

The harvest route delivery auto for the Moro meat market sheared the key off the rear right wheel Monday afternoon near Brackett's farm and had to be towed in. Roy Kunsman, the driver, said the trouble was caused by a flat tire.

Frank Hennagin had his auto radiator liberally sprinkled with grasshoppers when he arrived in town Sunday. The hoppers were wedged between the radiator fins. Because of the numerous pests Mr. Hennagin had to cut his oats for hay to save the crop. Others in the county are doing the same with parts of their crop yet green.
