Now is the Time to Put up Fruit.

While your wife is busy putting up fruit for the family to eat this winter, why don't you get busy and do the same thing for your stock? Tum-A-Lum Silos are to stock what the mason fruit jar is to the human-being.

TUM-A-LUM SILOS are designed to use just ordinary lumber, carried in stock at our lumber yards.

TUM-A-LUM SILOS are anchored by foundation bolts against the hardest winds blowing when the silo is empty. — We use no guy wires.

TUM-A-LUM SILOS are built all of wood and the expansion is the same through out. — We use no hoops.

TUM-A-LUM SILOS have double walls with air-space between which actually prevented frozen ensilage last winter. — Other silos with only one wall held frozen ensilage.

TUM-A-LUM SILOS are recommended by the U. S. government, see bulletin 589; by Washington State College, see bulletin 46; by Oregon Agricultural College, see bulletin 136; and by scores of practical farmers, above all single wall silos, for this hot dry climate.

TUM-A-LUM SILOS are just buildings — they cost less than other silos — there being no patents or royalties to pay for.

TUM-A-LUM SILOS are built from our Free Complete Plans.

TUM-A-LUM SILOS are furnished with all lumber, cement, paint, hardware — required — material is complete, except the sand and gravel for the foundation.
