

# The Home You Have Wanted

Did you ever get so far as to find out about what it would cost? Ever have or see a plan of it or anything like it?

Quite a few people have found after talking with us that building "the home they have always wanted" wasn't so big or expensive a job they had thought, and today they are enjoying their new home

Our architects have planned in the last year over 100 homes for customers. We can make your ideal home, fit your pocketbook

Just give us an idea of the kind of house you have in mind—our big new Free Planbooks help you to decide—and we will submit blue-printed plans with our right price on all material necessary for the building. Simple, isn't it? no obligation to this at all, no "peeving" if you don't buy.
