There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Considerable has been said and more written about the military "tanks" put in use last summer by the British against the Germans. Memory is very much at fault not to recall that that is not the first military "tank" mentioned by historians. Read what Plutarch has to say about Alexander's capacity for wine.

Everybody likes to patronize home industry and this is more particularly the case when you can get better quality at the same or a better price. There were 133,442 more cattle and horses, and 602,558 more sheep and goats using the National forests in 1916 than in 1915. The cost of sacks used by farmers to contain the grain produced in the Columbia river counties amounts annually to from $5,000,000 to $7,500,000. The annual saving from bulk handling would be well worth the new method of marketing grain. Grain is marketed in bulk in all other parts of the United States and most foreign countries, it should be in the Pacific northwest and within a few years will be handled that way.

DODGE BROTHERS
MOTOR CAR

Consult the impression uppermost in your mind and you will find that you think of this car as very carefully and very conscientiously made.

This very general and instinctive feeling is a reflection of the actual facts.

People think of the Dodge in this light because of their high opinion of the Dodge Brothers as manufacturers.

This good opinion is justified by the performance of the Dodge car, by its economy and efficiency, and by the fact that even the first two years' very large production did not develop a single fault.

It will pay you to visit and examine this car.

The gasoline consumption is unusually low.
The tire mileage is unusualy high.
