

"Life of Our Saviour"

A Dramatic Masterpiece
in 7 Reels
PATHE COLORED

Some two thousand years ago there was born at Nazareth, He whose teachings have enlightened the world. The events of Jesus' life, from the manger to the ascension, make the most stirring story of all time to all the races of mankind. The Pathe Company, to fill a long-felt want, organized a company of the best actors and produced THE LIFE OF OUR SAVIOUR, an accurate, superbly acted, dramatic visualization of Jesus' journey on earth. The compilation of this chronology of Jesus is truly an achievement worthy of the highest praise as it truthfully and geographically portrays with grace and dignity His suffering and final achievement. This work represents a lifetime of careful study and an immense financial outlay, and because of its tremendous subject is THE WORLD'S GREATEST DRAMA. The picture is colored and exquisitely arranged so as to bring to the vision a graphic realization of the infinite simplicity, yet monumental strength of Jesus.

BUY HARNESS NOW!

Buy It From Us

You may think you can get along without that new set of harness this winter, and possibly you can—BUT WILL IT PAY YOU? The time lost in repairing and tinkering and cussing on old and broken and unreliable harness will just about pay for a new one. And time is money these days. Then broken harness often cause runaways, and they often result fatally to the driver or the animals. No, unreliable harness does NOT pay. Buy a new set NOW, and buy it from US, where it is BEST and CHEAPEST.

ECONOMICAL POWER

POWER—Power is the very life of your car. It is the energy that makes the car leap forward in the instant get-away. The energy that carries you swiftly and smoothly on high speed without effort. It is the energy that takes you over the hills, through the deep sands, and through the snow drifts of winter.

POWER makes your car easy to drive on the Road or in Traffic. Power makes you forget the mechanism of your car. It meets the emergencies of travel and traffic without noticeable effort, without faltering. That is the way Studebaker has made Studebaker cars the most powerful cars on the market in ratio to weight.

They have made them powerful by perfecting design—four years Studebaker Engineers have concentrated their skill improving, refining and perfecting Studebaker motor designs, until today Studebaker is the most powerful car on the market, in ratio to size and cost.

At the same time it is economically powerful. It gives you great power with very reasonable gasoline consumption.
