GENUINE LEATHER

Studebaker bodies are upholstered with gen-
uine leather, and it is of high grade quality—
the same that you find on cars costing from
\$500 to \$1000 more than Studebaker cars.

It is soft, pliable, durable, fast-colored, and it
will not work off, scale, crumble or check. We
describe this leather to you because it shows
the quality of material that Studebaker uses in
the construction of its car.

Expense has not been spared to cheapen the
car in any particular. It is distinctly a high-grade
fine automobile. Your comfort, your safety,
your pride, have all been considered in the de-
sign and construction of both the FOUR and
SIX.

It costs only a little more to obtain the qual-
ity that you find in Studebaker cars, and this
quality is the thing that gives you real economy.
"It is better to pay a little bit more and get the
BEST."
