Look at these Beaver Board Walls and Ceilings

THEN picture to yourself the beauty of the pebbled surface, painted in warm, soft colors; and you get some idea of the superiority of Beaver Board to lath and plaster.

But you ought to see the real thing, and we shall be glad to show it to you, as no picture can tell the whole story.

Beaver Board never cracks; it resists

passage of heat, cold and sound; it is more sanitary than other materials; it is very quickly and easily put up.
