THE SCRIBBLER.

Substituting High Bred for Hybrid

In a campaign to retire scrub bulls from the herds of the state, seven Wisconsin counties have made plans to follow the example of Fond du Lac county, which in one month placed 43 pure-bred sires on farms, 38 going to herds that never before had had pure sires.

The drive against scrub sires was started at the December conference of Wisconsin county agents, and is in charge of a "steering committee" representing the extension service, the State college of agriculture, leading stockmen and officials of farmers' organizations. Breeders believe that the elimination of the scrub and grade sire will greatly improve their markets, and appreciate that out-of-state buyers visiting Wisconsin for dairy cows insist on stock sired by pure-bred bulls.
