The Tractor for Service

The Caterpillar is built to give service, and it is backed by service, of which our annual Caterpillar School, free to owners and operators, is only one of the big features. That the Caterpillar gives exceptional service—day after day, year after year—is testified to by thousands of satisfied Caterpillar owners.

The Caterpillar won't slip, won't mire, won't pack the soil. It does all the work that other tractors do, and does it better. Besides, it works in places and under conditions where no other type of tractor power can be used successfully. Caterpillars are at work in Alaska at 40 degrees below zero in the Sierras, hauling ore over rough and rocky roads; in swampy lands, where even horses cannot work without log skids.

Holt design and Holt construction have put into the Caterpillar endurance, long life with low upkeep, the sort of dependability that makes the work run smoothly without annoying and costly delays.

Write for further information about the Caterpillar—the leading tractor in the United States today. The Caterpillar is built in several sizes—a size for every sort of tractive work.

There's Only One Caterpillar. Holt Builds It.
