OWN YOUR OWN HOME!

WHAT joy it would be to have a home all your own, built as a home should be built, arranged as you've always wanted your house, everything ordered as you want it, when you want it. There's nothing like owning a home to make a man realize that he's a substantial citizen, or to give people the confidence in him he deserves. You can't measure the value of owning your own home on a dollar and cents basis alone—and yet with rents still on the increase and the price of building material stabilized, probably for years to come, home building and home owning never was a better investment. Just add to that the satisfaction and contentment for your wife, a better place for babies to grow up in, a more livable environment.

A Safe Investment

YOUR house and lot are as safe as a bond. There is an unprecedented market now for improved property—you can "cash in" any time you wish. Five years hence, even though building prices slowly settle to a lower level, the tremendous building activity that must come in the meantime will give your investment a substantial increase in value.
