An inside patch after your tire has been entirely cut through by some sharp object is nothing more than first aid. It is by no means a permanent repair. A temporary patch will usually pull away from the position it originally held and force itself through the break. When inside patches are used an outside emergency band should be applied, but both removed as quickly as it is possible to get to a tire man and have a permanent repair made. Thousands of tires are prematurely scrapped each year because the necessary repairs have been neglected. Injured tires, from what ever the cause, are quickly, efficiently and promptly repaired by L. M. Thompson at the Moro Tire Shop.

A Business Maxim

"A man is judged, not alone by the company he keeps, but by the manner in which he pays his bills."

The fellow who produces a roll of bills and peels off the number required to meet an obligation might formerly have created a favorable impression.

Nowadays people are likely to wonder why he isn't progressive enough to keep his money in bank and check it out as needed.
