"Sowing" Dollars for a Thrift Crop

SOWING the seed is only one step in the production of a crop. If the harvest is to be abundant, favorable conditions must be maintained. To the business man, this means favorable credit conditions.
The Federal Reserve System is the great stabilizer of commercial credit conditions today. It insures an ample supply of such credit at all times.

"Here's Real Tobacco"
says the Good Judge

That gives a man more genuine chewing satisfaction than he ever got out of the ordinary kind. Smaller chew, lasts longer—so it costs less to chew this class of tobacco. And the good, rich tobacco taste gives a world of satisfaction. Any man who uses the Real Tobacco Chew will tell you that.

DELCO-LIGHT
Increases Farm Efficiency

Fifty thousand Delco-Light plants in operation on American farms are saving at the most conservative estimate, an hour a day each—or over 18,000,000 work hours a year. That is equal to an army of 60,000 men working ten hours a day for a full month.

Delco-Light is a complete electric light and power plant for farms and suburban homes. It furnishes an abundance of clean, safe, economical light, and operates pump, churn, cream separator, washing machine and other appliances. It is also lighting rural stores, garages, churches, schools, army camps and railway stations.
