is porous.

Farmers of America

The farmers have built America, for
despite the growth of our cities, America's
agricultural industry is still the greatest
in the world.

As the world has progressed, the farmer
has improved his tools and his methods
until today with fewer "hands" the farmer
produces greater crops than ever before.

Good banking service is one of his require-
ments. All our facilities are at the dis-
posal of our farmer-patrons.
