IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR THE COUNTY OF SHERMAN

The W. M. Barnett Bank, a corporation, and Independent Warehouse and Milling Company, a corporation, Plaintiffs,

vs

H. B. Thornberry and Ma-bell A. Thornberry, husband and wife, De Tweede Northwestern and Pacific Hypotheekbank, a corporation, Pacific Grain Company, a corporation, Walther Williams Company, a corporation, J. P. Yates, doing business under the name and style of Wasco Lumber Company, F. R. Fortner and Anabelle Fortner, husband and wife, Robert B. Hailey and Estrelle Ford Hailey, husband and wife, and Jim Shaw, Defendants.

To the above named defendants, H. B. Thornberry and Ma-bell A. Thornberry, husband and wife:

In the Name of the State of Oregon:

You and each of you are hereby required to appear and answer the answer of the defendants above named, Robert B. Hailey and Estrelle Ford Hailey, filed against you in the above entitled suit, which answer is in the nature of a complaint in equity, wherein the said Robert B. Hailey and Estrelle Ford Hailey pray for affirmative relief, within six weeks from the date of the first publication of this summons, to wit, on or before the 18th day of May, 1922, and if you fail so to do for want thereof said defendants, Robert B. Hailey and Estrelle Ford Hailey, will apply to the court for the relief demanded in their said answer, to wit, that in decreeing a foreclosure of plaintiff's liens it be decreed that the defendant, Robert B. Hailey, has a valid and unexpired lease upon the premises described in said lease, to wit, the Southwest quarter of Section 14, the Northeast quarter of Section 22, five hundred and forty (540) acres in Section 23, the South half and the Northwest quarter of Section 24, about forty (40) acres in the Northeast quarter of Section 25, about three hundred and fifty (350) acres in Section 25, all in Township 2 North, Range 16 East, Willamette Meridian and the Northwest quarter of Section 30 in Township 2 North, Range 17 East, Willamette Meridian, known as the "Grebbe Farp," situated in Sherman County, State of Oregon, and the Delecio Lighting Plant and the Ice and Cold Storage Plant located thereon, and that said lease will not expire by its terms until six years from September 1st, 1921; that the defendant's said lease is subject only to the second and third mortgages being foreclosed and to the first mortgage held by the defendant, De Tweede Northwestern and Pacific Hypotheekbank.

That the claimed liens of said defendants, Pacific Grain Company, a corporation, Walther-Williams Company, a corporation, J. P. Yates, doing business under the name and style of Wasco Lumber Company and Jim Shaw, be ascertained and determined and that each and all be decreed to be subsequent to and subject to the lease to the said Hailey, aforesaid.

That the interest of the said defendant, Ma-bell A. Thornberry, be ascertained and determined and that it be decreed to be subject to said lease.

That it be decreed that the said defendants, F. R. Fortner and Anabelle Fortner, have no right, title or interest in or to the said premises so leased to said Hailey.

That a decree be entered herein adjudging and decreeing that as against those claiming under liens prior to the lease of the said Hailey, aforesaid, said defendant, Robert B. Hailey, has the right of possession of the leased premises during the period of redemption and that as against all others and H. B. Thornberry during the life of said lease.

That defendants answering have judgment for their costs and disbursements made and expended herein and for such other and further relief as to the court may seem just and equitable.

Service of this summons is made upon you by publication of the same in the Sherman County Observer for a period of six consecutive weeks by virtue of an order made by the Hon. E. D. McKee, County Judge of Sherman County, State of Oregon, on the 29th day of March, 1922, said period of publication being the period prescribed by said order and the date of the first publication is the 31st day of March, 1922 and the date of the last publication being the 12th day of May, 1922.

Huntington, Wilson & Huntington, Attorneys for defendants, Robert B. Hailey and Estrelle Ford Hailey.

Post Office address of said attorneys, 810-813 Lewis Building, Portland, Oregon.

Practice of Righteousness.

Skill in advising others is easily attained by men; but to practice righteousness themselves is what only a few can succeed in doing.—Hitopadesa.

TO THE FARMER

Experience of the Other Fellow

Common millet, Sudan grass, Kudzu, Kaffir corn, Milo maize, grain sorghum, and Hubam clover are causing a lot of inquiry at the experiment station these days. None of them offer much promise in Oregon when compared with the staple crops for similar uses.

Seed potatoes from a neighboring county were brought to the experiment station recently for examination by the crop specialist. One lot contained about 60 per cent diseased and off type spuds and the other had about 95 per cent such potatoes. Only smooth, well shaped, and disease free spuds should be used for seed.

Good beef bulls of the right conformation bring calves that make the most efficient meat producing animals. Many good bulls are for sale by breeders now, and at prices so low that every scrub bull should be driven out of the country. Every stockman who is financially able will find this an ideal time to purchase a registered sire for his herd.

The application of fertilizers to a soil will not take the place of a well prepared seed bed. The larger crops produced by the use of fertilizers must draw on the soil for its main supply of plant food, and requires more moisture than the smaller crop. A well prepared seed bed makes the plant food more available and increases the capacity of the soil for moisture.

Many of the farmers are treating their seed potatoes for disease this Spring for the first time. Our local druggist, Mr. Schade, reports having sold more corrosive sublimate in one day this year than he had sold altogether during the last two years. The recommended treatment for seed potatoes is soaking from one and one-half to two hours in solution of four ounces of corrosive sublimate dissolved in thirty gallons of water. This treatment is fairly effective in controlling potato scab and Rhizoctonia or black scurf.

Thirty six sacks of Oregon Certified Early Ohio seed potatoes have just been distributed thru the county agent office to farmers in various parts of the county. These potatoes are from the only field of certified Early Ohio grown in Oregon last year. They were inspected in the field at blooming time by County Agent Carpenter and again after digging by Professor Hyslop. They are the best seed of this variety that could be secured in the state yet they were delivered to the farmers at a saving of \$1.50 per hundred pounds, compared with the price being paid for common stock.

Pointers on Poultrying

Poultry meetings were held at Rufus, Moro, Gorman school, Grass Valley and Kent last week. Professor Brewster of O. A. C. was present at these meetings in the capacity of expert poultryman, and his timely, practical suggestions were received with interest. Professor Brewster says that it is very important that chicks get plenty of exercise and plenty of fresh air, and that over-feeding is often the source of much trouble. It is dangerous to feed chicks before they are 60 to 72 hours old. It is best to start them with some sour milk or buttermilk and some fine sharp grit or sand. A few hours after this preliminary feed a chick scratch food of finely cracked mixed grain should be fed. A good way to feed the grain at first is on paper plates or boards. This should stay before the chicks about ten minutes at a time and should be offered five times daily. The second day a little chaff may be scattered on the floor and the paper plates turned upside down, putting the feed on top. The chicks will scatter the feed in the litter and get started to scratching. The paper plates may be discarded in two or three days and the litter increased to a depth of two or three inches by the end of the first week. The exercise they get by scratching is good for them. If plenty of milk is available the chick should have nothing else to drink for two or three weeks. If plenty of milk can not be had, clean, fresh water should be provided.

Most commercial poultrymen use a commercially prepared scratch food, as this is usually an economical and better for the chicks and less trouble than the common rations of corn bread, boiled eggs, etc., that many people use.

Feed sparingly and often the first week. Keep sour milk or butter milk before the chicks at all times.

At Anchor in the Bay of Yeddo. The evening we dropped anchor in the bay of Yeddo the moon was hanging directly over Yokohama. It was a mother-of-pearl moon, and might have been manufactured by any of the delicate artisans in the Hanchodori quarter. It impressed one as being a very good imitation, but nothing more. Nammikawa, the cloisonne-worker at Tokio, could have made a better moon.—Thomas Bailey Aldrich.

CATHERINE HUGHES

Catherine Hughes, daughter of the secretary of state, whose engagement to Chauncy L. Waddell of New York was recently announced.

PRINTING BUREAU CLOSED FOR CHECK

Washington, D. C.—The division of the bureau of engraving and printing, engaged in the production of bank notes, bonds and postage stamps, will be closed for an indefinite period for the purpose of taking an inventory of the plant from which James L. Wilmet and twenty-eight chiefs, superintendents and foremen were removed by presidential order one week ago.

A demand for an explanation of the order to close the bureau of engraving and printing developed the following qualified statement from the treasury department: "The statements appearing in the newspapers to the effect that a vast volume of duplicate bonds and other securities have been fraudulently issued and are in circulation are wholly without foundation. "There has been no evidence developed for any such situation either in the bureau of engraving and printing or elsewhere in the treasury department. "Unofficially it is admitted that evidence of fraud in the duplication of Liberty bonds, large notes and stamps has been discovered.

BRIEF GENERAL NEWS

General Erich von Falkenhayn, ex-minister of war and one time chief of staff of the German army, died Saturday at Potsdam.

Six persons were killed when airplanes on the Paris-London aerial express route collided over the village of Theulieu, 70 miles north of Paris.

Seventeen persons were reported dead and more than 80 injured as a result of tornadoes and rain storms which swept from west Texas east into Oklahoma toward Arkansas.

Over 40,000 acres have been set out in grapes this year by California farmers, according to reports. The vines are all wine grape stock, and should commence to bear in three years.

Income tax collections in the New York district for the first quarter of 1922 reached \$86,944,968.87, a decrease of 5.3 per cent from the amount received in the corresponding period of 1921.

A drastic move to curb the crime carnival in greater New York resulted in authority being given to Police Commissioner Enright by the board of estimates to add 1192 men to the police force.

Appraise Washington Phone System. Olympia, Wash.—Preliminary arrangements have been made by the corps of engineers that will appraise the properties of the Pacific Telephone & Telegraph company prior to the formal rate hearing ordered by the department of public works, to start on their tasks within a short time. There are 102 exchanges in this state, ranging from the Seattle offices with their 77,000 subscribers to the small stations with two or three telephone users. And to make the inquiry into telephone rates through the valuation of all these exchanges, with their local and long-distance lines, must be checked up.

23,000 Apply For Oregon Bonus. Salem, Or.—There have been received at the offices of the world war veterans' state aid commission here, a total of 23,000 applications for loans and cash bonus, which if approved in full by the commission will represent money allotments aggregating \$30,126,500. Of the total applications received 13,648, or 59.7 per cent, of the applicants asked for cash bonus, while 9206, or 40.3 per cent, of the applicants sought loans. A total of 146 applications were rejected.

Sayings of Seers and Sages and
Live Local Lines

The essence of eloquence is having something to say.

In women's apparel, the divorce suit will be in vogue this season.

It's a wise cow who knows her own milk after it's delivered to the city.

"Why is your wife so jealous of your stenographer?"

"She used to be my stenographer."

California grows more lemons than any other state, except this state of matrimony.

The fact that a woman can read her neighbors is no evidence of her capacity as a cook.

Trouble is with so many people, when they hit the nail on the head, it's their thumb nail.

Another good thing about living in a garage is that you can let the baby cut its teeth on a tire.

In order to stick somebody good and proper the scamp must first acquire a reputation for honesty.

It's a blessing that Heinie constructed his obstructions out of barbed wire and not American red tape.

Divorces last year totalled over 110,000. Of course, with greater prosperity more men can afford them.

The old-fashioned girl showed individuality, but the twentieth-century girl shows almost everything else.

A sailor, who had never seen a windmill before, exclaimed: "Gee, Mister, that's some electric fan you got out there cooling the hogs."

Hickory, Dickory, Dock!
The mouse ran up the clock.

The commotion it caused was shocking.

The clock happened to be on her stocking.

THE SENTRY

When a plumber makes a mistake, he charges time for it. When a lawyer makes a mistake, it's just what he wanted. When a carpenter makes a mistake, it's just what he expected, because the chances are ten to one that he never learned his business. When an electrician makes a mistake, he blames it on induction, because nobody knows what that is. When a doctor makes a mistake he buries it. When a judge makes a mistake it becomes the law of the land. When a preacher makes a mistake nobody knows the difference.

But when The Editor makes a mistake—there rushes forth the gang with the hempen cord, to string him up to the nearest limb; or a guy with a six gun to puncture The Ed's anatomy; or they who sling mud, and bricks; and the grand old world joins in the joyous jubilee, dancing the latest jazz upon The Editor's neck.

This little poem centers on Wyoming, but its spirit is of the entire West, and to such is it applicable. It is entitled "Roaming in Wyoming."

Away out west in old Wyoming,
Where for homesteads they go
Roaming,

Where the big buttes are in sight,
Where the coyotes yell at night,
Where the air is crisp and bracing,
Where there's sheep and cattle
grazing,

Where the antelopes wander out,
Where sage chickens fly about;
Where they're in their shacks by
dark,

Where the prairie dogs do bark,
Where sage grass and cactus grow,
That is where I love to go,
Where they greet you with a smile,
Where they don't care 'bout your
style,

Where the handshake is much
stronger,
There is where I love to wander—
—M. M. Kennard, in Omaha News.

In the vicinity of Devil's Hollow, several miles east of Quapaw, Okla., there is a wigwam-shaped church building located miles from any white man's habitation, and a long distance from the nearest Indian domicile, where, says the Detroit News, the Quapaw full-blooded Indians congregate regularly to worship the Great Spirit in silence. They sit about a tiny fire that has been built on a stone base in the middle of the dirt floor, from Saturday night at sundown till Sunday noon, fasting and praying, but never speaking a word. A feature of their church meetings is a feast that follows the fast and religious rites. The meal is served in a little mess house near by, and when the services are over the squaws, who have slipped out a few hours before the time to close, are ready to partake of the food that is always a part of the program. The church was built many years ago, so that the residents might have a place of worship, a custom still kept up, regardless of the fact that there is no preacher, no choir, nothing to call them, but the religious spirit of the Indian.

GOETHALS INDORSES IRRIGATION PROJECT

Gravity System From Pend Oreille River Advised in Official Report.

Olympia, Wash.—General George W. Goethals finds the Columbia basin irrigation project in this state feasible from an economic and engineering standpoint by using a gravity supply from the Pend Oreille river and that it can be constructed in six years for a total cost of \$254,170,351, or \$145.56 an acre.

This is the conclusion reached by the noted engineer in his report, made public here by D. A. Scott, state director of conservation and development, after he had made an extended personal investigation and study of the project to determine the feasibility of the Columbia river pumping project and the Pend Oreille river gravity system.

Nearly 2,000,000 acres will be reclaimed through use of the Pend Oreille river diversion, it was estimated.

"The Columbia basin project is as much a national one as were the Panama canal and the Alaska railway, and will, if completed, add much more to the national wealth than either of the others mentioned. The work should be provided for and carried out as were these other two national projects—by direct appropriations," declared General Goethals.

Because of its larger area, greater assurance and reliability of operation and its smaller acre cost, General Goethals advised adoption of the gravity system. It will, he says, irrigate 1,752,000 acres by direct flow, with an additional 91,000 acres that may be reached by a pumping lift of less than 100 feet, and 137,000 acres that may be utilized by pumping at slightly higher lifts.

Example of the Artist.

How much happier humanity would be if work instead of a means of existence, were its end! But, in order that this marvelous change may come about, all mankind must follow the example of the artist, or better yet, become artists themselves; for the word artist, in its widest acceptation, means to me the man who takes pleasure in what he does.—Rodin.

The Word "Trash."

The word "trash" originally meant fine brushwood or twigs. Sellers of firewood frequently filled in the center of the bundle of sticks with the small, useless stuff to make the faggot seem bigger.

TROOPS FOR STRIKE DENIED

Request of Governor of New Mexico For Federal Soldiers Refused.

Washington, D. C.—The administration's determination not to use federal troops in the coal strike unless all state agencies fail in preserving order was set forth clearly after a conference between President Harding and Secretary Weeks. A request for troops from the governor of New Mexico was denied flatly.

As a public announcement of the administration's hands-off policy so far as use of federal troops is concerned, Secretary Weeks made public after his visit to the White House a telegram to Governor Mechem of New Mexico, replying to an appeal for help in handling the situation in his state.

"Unless disorder develops to a point where state authorities are unable to preserve order," said the message, "federal troops cannot be used in connection with the coal strike."

Explorer Amundsen Nearly Killed.

Clarion, Pa.—Captain Roald Amundsen, the Arctic explorer, and four flying companions narrowly escaped death at Miola, near here, when the monoplane in which they were making a flight from New York to Cleveland, the first lap of a transcontinental journey, turned over when it was forced to land in a field.

Floods in Middle Western States.

Chicago, Ill.—Spring freshets which have already flooded many lowlands threatened serious damage in many middle western states. Rains almost torrential sent the rivers up in Michigan, Wisconsin, Illinois, Missouri, Kansas, Oklahoma and Arkansas.

You Must Believe This.

Perhaps the most remarkable freaks of lightning was that related by John Still, the famous bishop of Wells. A storm broke over Wells cathedral during a service. Afterward the bishop, his wife and many members of the congregation found themselves marked with a cross on various parts of the body. Not a soul was injured by the lightning.

An Eastern paragrapher wants to know what has become of the old-fashioned editor who used to write that Bolshevism was nearing its fall in Russia. Perhaps he is telling how Bolshevism saved itself by changing all its clothes.

Although the regent of Abyssinia owns an automobile he often has his chauffeur go on ahead while he follows on a mule. We take it that if anyone wants to buy an A-1 automobile right cheap here's a chance.

AFTER EVERY MEAL
WRIGLEY'S
THE PERFECT GUM
MINT LEAF FLAVOR
Satisfies the sweet tooth and aids appetite and digestion. Cleanses mouth and teeth. A great boon to smokers, relieving hot, dry mouth. Combines pleasure and benefit. Don't miss the joy of the new WRIGLEY'S P-K—the sugar-coated peppermint tid bit!
