Hydro-Toron Tires
WEAR ONLY ON THE OUTSIDE

Driving on Hydro-Toron tires will give you a new experience—a pleasing certainty of uniform mileage that is not possible with any other tire. They simply won't go down until they have delivered their full quota of mileage—and frequently exceed that quota. Let us prove these claims by putting one, two or four tires on your car now.

TORON (No-Rot) FABRIC
Every layer of fabric is treated with Toron, which has a definite affinity for rubber and retains the damping effects of water and air. The holding power of Toron to each other, of tread and cushion coats and all parts of the tire, is ten times increased—40 per cent greater, in fact, than in average tires. Toron fabric has much greater tensile strength than fabric used in other tires.

INTERNAL HYDRAULIC EXPANSION
This new process makes it possible for us to design Hydro-Toron tires that are practically all-cotton and fabric, that there are no "studs," that expansion, with resulting cushioning, shock-absorption and tire wear, is more uniform than any other tire. The Hydro-Toron tire is made of road service against these common troubles. It means that Hydro-Toron tires are positively waterproof, both inside and out.

Big As Cords—Better Than Cords
Toron fabric not only protects the life of tires on the wheels, but prevents more tire and tread on the road's surface from going bad. The Hydro-Toron tire—fabric and rubber—against the different forms of deterioration. Remember, the Hydro-Toron tire gives you more mileage per dollar than any other tire.
