the camp cookery boys of the Rutledge school prepared an exhibit of biscuits that tasted as good as they looked. The domestic science department received some practical experience by serving luncheon to all visitors.

At Kent on Friday the Wilcox and Liberty schools had exhibits to be placed with those of the Kent school. Wilcox also exhibited sewing and poultry club work, while Kent exhibited sewing, camp cookery and calf club work. The Wilcox school was awarded first place for rural exhibits and the primary department had that well deserved honor for the Kent school. The two spring calves and the three yearling heifers shown by the calf club boys deserve special mention.

Kent and Moro were the two schools exhibiting manual training work this year and will be the two competitors at the county fair. Judging from the work shown at the locals the competition will be very interesting.

During the past week local declamatory and field meet tryouts have been held in the four central schools of the county. Judging from reports and attendance at a number of the events, the interest is unusually keen.

On Saturday, April 29th, the second local teachers' institute of the year was held at Grass Valley. The institute was unusual because each one of the expected speakers of the day was absent. But the spirit of interest shown by the teachers and citizens of Grass Valley made the day one that was well enjoyed. Each subject that was to have been discussed by visitors and outside speakers was taken up by the teachers and handled in an interesting manner.

Sunday School Executive Meeting

An executive meeting and conference of the Sherman county Sunday School association will be held in the M. E. church at Moro on Sunday, May 14th, at 2:30 in the afternoon. The purpose of this meeting is to bring new ideas, successful methods, instructional and inspirational to all workers, and also to make plans for a county-wide Sunday School rally. J. M. Wilson of Kent will give a talk along the line of betterment of Sunday Schools. There will be special music. Everybody interested in Sunday School work should attend.

R. C. Byers,
County Sunday School Superintendent.

Notes for the Chick Raiser

Avoid over feeding. It is responsible for much of the loss met with in raising chickens. If they are not hungry at feeding time, cut down on the feed.

Don't feed wet mash. Be sure that the crops are well filled, but not gorged, when they go to roost at night.

Don't feed on the bare ground, bare floors, or in filthy, damp litter.

Don't let the chicks get chilled at any time. Chilling paralyzes the digestive organs and the chicks will either die or be stunted.

Be sure that they have plenty of drinking fountains and hoppers so that they won't get crowded when eating or drinking.

Cleanliness is absolutely essential—clean houses, clean equipment, clean feed and clean yards.

Never feed moldy or rusty grain, nor grain that has smut in it.

Don't feed baby chicks until they are 48 hours old.

Don't allow spots of sunlight on the brooder floor when the chicks are young.

Don't leave tacks or shingle nails on the floor.

Don't keep the house stuffy.

Be sure to have the brooder house ready for the chicks before they come.

New Dry Treatment for Smut

The poor seeding conditions of last fall are now reflected in many places in the county by thin, spotted stands of wheat. That the seeding condition of the summer fallow is not the only factor responsible for thin stands is shown by the seed treatment demonstrations arranged by the county agent in the south end of the county. Matt Simon and Jake Wilson have a field of wheat with a showy green strip down the center that shows up quite noticeably from the county road. On either side of these verdant strips the stand is thin and ragged. In spite of all appearances to the contrary each of these strips was seeded at the same time and from the same seed as the rest of the field. The difference is in the way the seed was treated before planting. The seed for the main portion of each field was treated for smut in the customary way, that is, dipped in a solution of formaldehyde and water. The seed for the part with the good stands was thoroughly mixed with copper dust or copper carbonate at the rate of two ounces to each bushel of wheat. Copper carbonate is a fine, chalky powder, about the color of ordinary bluestones. This treatment involves no wetting of the wheat whatever.

On Jake Wilson's place the three drill widths seeded with dry treated seed had an average of eight plants per foot in the drill row. On the land seeded with dipped seed the average stand was six and seven tenths plants per foot in the drill row. This was on December 10th.

On April 22nd in Matt Simon's field the average stand per foot in the drill row of the dry treated seed was six and two tenths plants. In the rest of the field it was three and three tenths.

The important thing is yet to be determined: Whether the copper carbonate will effectively control smut.

Church Items

Mothers' Day will be observed at Spalding Sunday, May 14th, beginning at 2 o'clock noon. Every person in the community should be present to honor his mother, whether she be living or dead.

Next Sunday evening at the Presbyterian church the union meeting will be a "Father and Son" service. Every father in Moro and vicinity is asked to bring his son and to sit with him in church. Every lad is to bring his dad and the two sit together in church. Where lads or dads are missing borrow one from your neighbor for the occasion. Rev. Henry G. Hanson will preach on the theme, "Setting the Face for Dad." Time: 8:00. Wanted: 75 Dads with their Lads.

County Pledges \$1400 To Near East

At the Moro Theatre about 200 people assembled to hear J. J. Handaker of Portland present the needs of the sufferers of the Near East. The film, "Alice in Hungerland," presented in a very telling manner the suffering in that country, but especially the splendid humanitarian work that is being done in the Near East for more than 100,000 boys and girls, who otherwise would starve to death. The relief commission not only feeds them, but gives them industrial, intellectual and Christian training, which will make them the coming citizens of that country.

Four meetings were held in Sherman county last week. At Moro \$622 in pledges and cash was taken in; at Grass Valley about \$350; at Kent about \$300; and in Wasco over \$200. The solicitation at the public meetings is followed up this week by a house to house canvass for those who were not at the meetings. In some places the public schools are assuming the support of a child or two, this being the plan at Wasco. In addition, lodges are taking up the matter of assuming responsibility of caring for a child or more. Five dollars will care for one child a year.

Next Wednesday, May 10th, is set aside as "Old Clothes Day," when people who have cast off clothing that can be put to use, may bring the same to be sent to the Near East. In Moro children may take their bundles to the school house. Those who have no children in school may leave their bundles at W. C. Bryant's office. All clothing should be usable, and should be securely wrapped in paper. In the country the various schools will be asked to solicit clothes on the same day, and responsible people will call at the school buildings for the clothing. Henry G. Hanson, County Chairman.

Hydro-Toron Tires

WEAR ONLY ON THE OUTSIDE

Driving on Hydro-Toron tires will give you a new experience—a pleasing certainty of uninterrupted mileage that is not possible with any other tire. They simply won't go down until they have delivered their full quota of mileage—and frequently exceed that quota. Let us prove these claims by putting one, two or four tires on your car now.

TORON (No-Rot) FABRIC

Every layer of fabric is treated with Toron, which has a definite affinity for rubber and resists the damaging effects of water and air. The holding power of layers to each other, of tread and cushion blocks and all parts of the tire, is vastly increased—50 per cent greater, in fact, than in average tires. Toron fabric has much greater tensile strength than fabric not so treated.

INTERNAL HYDRAULIC EXPANSION

This new process makes it possible for us to say that Hydro-Toron tires are in practically all cases unblemished; that there are no "seconds," that separations, with resulting stone-bruise, rim-out, and blow-out, are so near unknown that we are able to guarantee 10,000 miles of road service against these common troubles. It means that Hydro-Toron tires are perfectly vulcanized, both inside and out.

Big As Cords - Better Than Cords

Toron fabric not only prolongs the life of tires on the wheels, but prevents spare tires and tires on the dealer's racks from going bad. The Toron seeds the deterioration. Remember, the 10,000 mile written guarantee protects you against stone-bruise, rim-out and blow-out.

Fithian Will Defeat Williams

VOTERS WANT LIVE COMMITTEEMAN

VOTE FOR

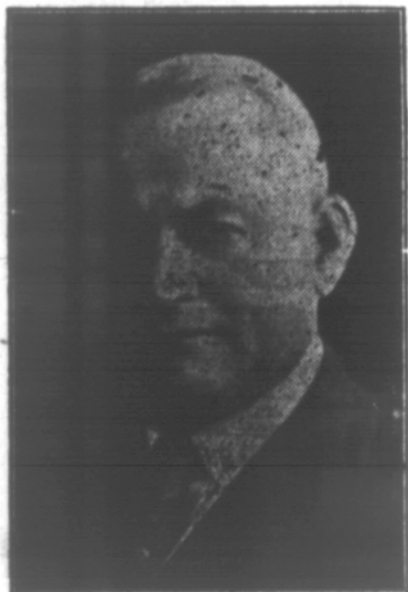

O. H. FITHIAN

Republican Candidate

For

**NATIONAL
COMMITTEEMAN**

ON MAY 19th

Portland, Too, Is For Fithian

REPUBLICANS ALL OVER THE STATE ARE GETTING READY TO VOTE ON MAY 19th TO ELECT O. H. FITHIAN NATIONAL COMMITTEEMAN, INSTEAD OF RALPH E. WILLIAMS, WHO HAS HAD THE JOB TOO LONG

PORTLAND DAILY NEWS SAYS:

"It is a refreshing and healthy sign when a busy and successful man takes off his coat and runs for an office that is salary-less and of dubious honor.

"Such a man is O. H. FITHIAN, wholesale shoe merchant, candidate for the office of Republican National Committeeman. He is opposing Ralph E. Williams, who has served since 1908. Originally Williams was a Democrat.

"Fithian is the head of the Fithian-Barker Shoe Co., Portland. It is literally true this time that 'the office seeks the man.'

MORNING OREGONIAN SAYS:

"That FITHIAN has organized a strong campaign and is conducting a vigorous battle, is evident to the public and it has undoubtedly caused uneasiness in the Williams camp."

PORTLAND TELEGRAM SAYS:

"Fithian, although a lifelong worker in the Republican party, has never sought political office.

"Williams is a professional politician who, after serving 14 years as national committeeman, wants still another term.

"In the 1912 national convention Williams was antagonistic to Theodore Roosevelt, despite the fact that the Oregon delegation was pledged to the great American.

"Fithian promises to work in harmony with Oregon's delegation in Congress.

"Williams has never worked in harmony with the delegation."

Local Fairs Show Big Improvement

The first local fair of the week was held at Rufus on Monday, April 24th.

The four schools of that section were well represented with school room exhibits as well as in the declamatory and field meet tryouts. An excellent crowd was present for all events and everyone enjoyed the hearty luncheon provided by the women of the different communities. Home-making, cookery and garden club work was shown by the Rufus school. The Miller school was given first place for school room exhibits.

In addition to the work shown by the Wasco school on Tuesday, three rural schools brought exhibits. Locust Grove showed sewing club work and also was awarded first place for the best school room exhibit from rural schools.

The Moro school fair held on Wednesday showed a marked improvement over the past year. The different departments of the Moro school showed especially good work but the greater improvement was seen in the work of the rural schools. Six of the eight schools in the Moro division brought in exhibits that showed a great percentage of improvement, both in quality and quantity. Under the direction of Miss Fitts the sewing and cookery club girls of Moro have practically completed all lessons and were able to make a remarkable showing with both classes of exhibits. The home-making girls, under the direction of Miss Peck, also prepared an excellent exhibit. Five of the six rural schools exhibited club work. Had places been given for the best club exhibit for these schools, the blue ribbon would without doubt have gone to the Harmony school. This school had the honor of showing a 100 per cent exhibit both in sewing and camp cookery. Great credit for this work is due Miss Grace Miller, the teacher. The Fairview school was awarded first place for rural school room exhibits while Harmony and Eskine were given equal rank for second. An especially pleasing feature of the afternoon was a fashion show by girls of the domestic art department, under the direction of Miss Fitts.

The fair at Grass Valley on Thursday was a decided success. Two of the surrounding schools brought their exhibits. Sewing, home-making and cookery work was exhibited by the club members of Grass Valley, and
